Universal-integral multi-level education in the Spirit of the New Age

February 3-4, 2024

The International Centre Goa

Dr. E Borges Road, Dona Paula, Goa - 403004, INDIA

Introduction

Nowadays, the Mind Hierarchy of humanity expects that the progressive people of the world should implement the Program for combining their experience to create a Focus of Forces. This focus is designed to model and energize the Image of the Future World in accordance with the Universals of the World Order.

The vision of the Future World is meant to encompass the multi-level evolutionary achievements of conscious humanity, unified within the Circle of Unity of the 12 civilizations represented by the Lotus of the World.

We invite spiritual and educational organizations and movements to collaborate at the conference dedicated to Universal-Integral Multi-Level Education. This form of education is based on the synthesis of the cultural achievements of the 12 civilizations of the Lotus of the World within the 5th Root Race.

The threefold experiences of family, kin, and national development shape Crystals of experience, which act as conduits for the Star Streams of the 12 meridians from the Sacred Zodiac. When these currents are combined, they stimulate sustainable development systems and have the potential to form the embryo of a new humanity.

The universal scientific worldview absorbs humanity's achievements and fruit of spiritual growth through the representatives of spiritual teachings in their synthesis, as the Image of the planetary future - the Temple of the New Epoch.

Universal-integral multi-level education will form a multi-level Image of the Future, create a focus of the forces of progressive thought of humanity, its scientific and spiritual achievements, reveal the true essence of a human creator, and form a nature-oriented path of his formation based on Pre-Destination.

India is the cradle of the synthesis of Crystals of experience and the birthplace of the program for a new cycle in the development of the 12 civilizations. It is essential to unite the 12 Crystals of spiritual experience from the global community with the 12 Crystals of experience from the peoples and cultures of India to resonate with the conception of a new Program of Life. This program will form the foundation for the creation of the new Lotus Temple of the World in the New Age of Aquarius.

Through this, the Tree of Life of the Mind Hierarchy of humanity will be renewed, fostering the development of human potential and enhancing humanity's value to the world.

That is why the conference will take place in the cradle of the mother of humanity, in India, where the Chalice of accumulated experience will be filled. Before the conference, an expedition will take place, during which its participants will resonate with the crystals of experience of cultural achievements and traditions of 12 sectors of India. This process will make set the premises of the stream-like education and the science of the Future, as a new grain of the Spirit in the formation of a universal scientific worldview.

We are creating the world of new quality based on humanity's spiritual achievements in accordance with the universal laws of nature.

We invite all progressive people of good will to cooperate!

*Polyakov V.A., founder and Head of the International Scientific School of
Universology,
Honorary Doctor of the "Lviv Stavropigion" University,
full member of the International Scientific Academy of Ecology and Life Safety,
Odessa, Ukraine*

**UNIVERSOLOGY - A NEW SCIENTIFIC PARADIGM OF THE NEW
ERA.
SYNTHESIS OF THE SPIRITUAL AND CULTURAL HERITAGE OF
HUMANITY**

Humanity must deal with many questions for which it cannot find answers. On entering the new age, the spirit of the new age of Aquarius requires a new scientific paradigm of understanding what is happening in the world. The age of Aquarius has come as a new movement of time, space, and energy. The formation of the streams of life has changed, but humanity is still trying to find answers to its questions in the old way, which leads to the disbalance of development, and instead of the harmonious cooperation with the world and nature, a human ends up with technogenic catastrophes, lack of happiness and one-sided disbalance. A human has always been searching for the path to the deity. Under the concept of deity, the cause of life must be understood, above all. God is the cause, and this cause is always not understood until a human is not able to discover of universal actions of this cause. They allow us to create the stream of life and to see the world with the inner vision, by building the temple of the new education and entering the portal of the new life.

This is the logic of the universalities of being, the logic of the choice of the path and the logic of following life itself in the most effective way of development, as in the flow of a river in Aquarius, which chooses its most effective way to the ocean of life. But for this it's needed to clean the "Augian stalls" of the past, by forming the universal algorithm of actions of the common laws of nature and being. This universal algorithm allows us to create the universal scientific picture of the world. This will allow a human to look at the world as it is, and not as it has been imagined. Humanity is trying to do it now. First, a place and role of a human as a conductor and co-creator of this life needs to be found, it must be understood where the disbalance of the development is, and how to form the relationships according to the universalities of the seven laws of nature, by moving towards each other and creating the united energy system. It will allow us to go beyond limits, by building the energy

channels of the mutually caused development from the past to the future on the steps of improvement [1, 2].

The universal models which are formed during this by a human, act based on the energy of Uranus. Uranus is responsible for the age of Aquarius, the architect of creation, which requires strict mathematical, physical, and chemical description of processes, as it has been suggested by the Pythagorean school.

The universal models developed by Universology are a group of universal schemes that reflect all possible states and processes that occur hierarchically and synergistically in the chains of space-time continuums. Between them, the impulse of creation relatively simultaneously flows from a larger system to a smaller, and between the systems on the same level, step by step forming the flowing synthesis, which forms the stream of life.

This universality of being is given to humanity to solve the questions that are posed before it today. How to find the cause of life? How to proceed to the cause of life without distortions, so that the disbalance would not conquer the world with chaos? The disbalance starts from a human, from his relationships, from societies, and is then scaled to the entire humanity. Building of the temple of life should become the goal of every human, group, and society, through the formation of such family, kin and national relationships, through which a human would be able to overcome this chaos. And God, as the cause of life, would be a clear orientation for him in his place and role in the temple of life, and the indication how to come the path towards the future, how to uncover the purpose in the search of the new world, and in this way, to open the path to the future based on strict systematic formations (fig.1).

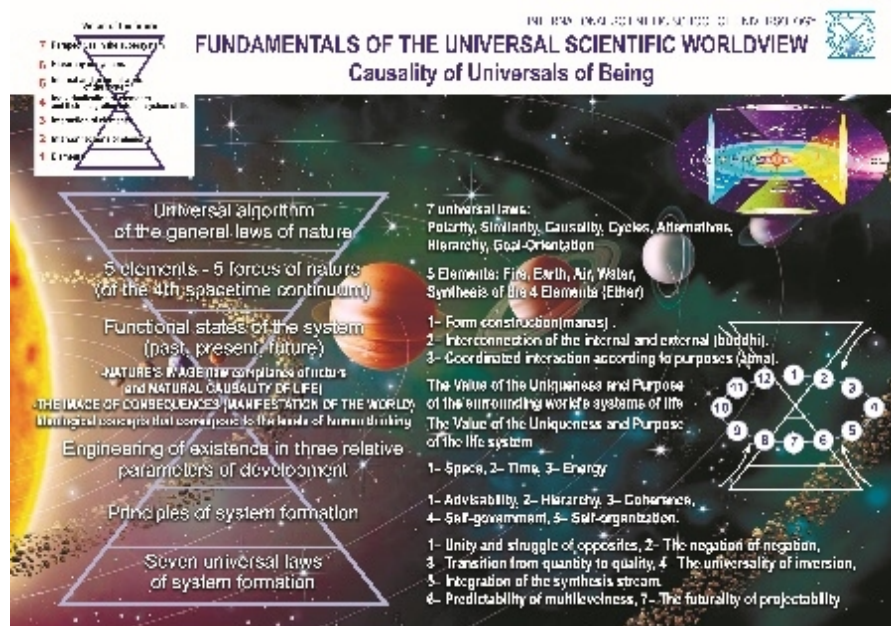

Figure 1. Causality of Universals of Being

How does humanity unite? Let's explore the ideal process, guided by the universal algorithm and natural laws, that shapes the Universe and, consequently, the life of humanity.

The temple of life of a human is being built in the unity of the family, kin, and national ones. This way, the triple experience of our purpose is collected. Family is personal experience (manas), kin – the collective experience (buddhi), and national – the national consciousness (atma). In this case, a human can exchange mutual gain, mutually enriching each other, and forming collective relationships. By collecting these relationships together, like a life from the heart, the national temple is formed.

Three circles are the energy channel for bringing the consciousness to the new quality level. Support of the balance in management, most notably, is the balanced development. Imbalance and crisis exist in the world for exactly the reason that nations don't know their purposes, and because civilizations don't know their places and roles in the interconnection of the past, present, and future.

The realization of the purpose of every human occurs in 7 steps of development according to the universal models. We show how these steps are characterized systematically, and how a human gets to know his purpose as a structure of life, also from the point of view of forming the dynamics of 12 stages, which takes its beginning from the characteristics of Zodiac and creates the general cycle of the temple of life of a human. The world has its organizational structure in space and its development dynamics in time.

Everything reaches the summit of achievements. This summit is four dimensions, or that the completeness should be achieved by a human, group, and nation, when the path of 7 steps towards the new life is walked. Algorithm of 7 steps – the polarity that brings on the cause of life, continuity, causality, cyclicity which opens the path to the stream of life. This is the fifth, and very important, stage, and the fifth level that corresponds to the age of Aquarius. We are forming the collective consciousness, the streamy thinking, non-standard causal-systematic and sensual-logical reflection of the world. By following this path, we climb to the summit of achievements, where a human, by the inversion of goal-oriented development, discovers the world of the future. This is nothing else than the toroidal, five-dimensional formation of the world, this is the balance that Leonardo da Vinci has been suggesting to the world already long ago. Our ancestors called the balance of the 4 elements “the dead water”, and the integrational process “the live water”. This integrational process allows us to create the bright individual and his relations, his world that will surround him as the temple of life.

This is the pulsation of life, because by reaching the summit of achievements in the powerful stream of goal-oriented development, the electric, magnetic,

electromagnetic, and gravitational fields are created on the summit of the transitional process. Then the torsion field is created as the completeness of development.

The awareness of it requires the enlightenment and the new education, the creation of the new image of the future, and of course the new way of forming the relationships, as living through the seven steps towards each other of people, groups, societies, and of course nations, according to the seven universal laws of formation of relationships.

The key is to envision humanity as a heart. Agni Yoga teaches us to live in the heart, in harmony with the heartbeat of the Universe. Let's imagine this process and apply it to the full development of humanity. Naturally, the Universe evolves in a similar way. However, what matters most to us today is the transition from the past to the future, which has emerged at the turning point of the ages. Humanity feels defenseless because it lacks understanding of how the Universe, or our Solar System's stellar temple, pulses in accordance with the universal principles of existence, which require their own orbits for everyone.

We belong to the fourth orbit, not the third, as it includes Vulcan, Mercury, Venus, and Earth. Accordingly, we must be heart-centered and build relationships in harmony with the heartbeat of the Universe. Humanity, as the fourth kingdom of nature, is influenced by this rhythm. The three higher planets guide the development of collective, social, and global levels, while the three lower planets shape how we overcome the imperfections of our nature and improve the roots of the tree of life, corresponding to the mineral, plant, and animal kingdoms.

This way the Lotus of life of our seven fundamental races is formed. And in every fundamental race this universal model is formed as well. According to the universal model, from the core as the summit of achievements, orbits-civilizations are formed by the spreading of the impulse of creation, in the same way as from the core of an atom f-orbits are formed in all 12 directions (by the analogy with s, p, d, and f-quantum orbits of the atom structure according to the periodical table of elements of Mendeleev). The radiation towards the new world allows to form the program from the core and the reverse movement of the collected experience, which returns all the achievements to the core. And this is the way the world gets exactly this synthetic base to turn the world around on the summit of the pyramid, and to discover the new one.

We can speak about the seven fundamental races with the help of the universalities of development. And before us preceded the Atlantic race, which was exactly the transformation point, the fourth race. And by entering the fifth one, the Rassenie (seed-spreading, according to the Slavic-Arian Vedas) occurred, or the expansion of the world that this way had created the universal model of the 12 stages

of development. This universality is attributed to both macro- and microcosm: the space structure has seven levels, and the forming of the involution-evolution process of gaining the knowledge and synthetic integration of the diverged occurs in 12 stages. That's why the 12 main civilizations of the 5th fundamental race, just like the 12 principal constellations in the Solar system, are determining the goal-oriented development. In the beginning, there was the expansion in 12 directions in the fourth continuum of our fourth planetary level of orbit in the Solar system, and nowadays there occurs the integration, synthesis, and collection of the diverged experience by the core (fig.2).

Now this is the perfect model for us. The real model is the eternal wars because of the low level of culture and inability to unite. Therefore, there is the time to spread stones, and there is time to collect them. Humanity should become aware that the time to collect stones has come.

Figure 2. 12 Civilizations of Lotus of the World.

It means that on the level of every civilization the triple experience is collected. This triple experience, as the three circles of the universal scheme, creates the hologram model of the three circles: 12, 8, and 4 elements.

It is the temple of life, the family, kin, and the national one, and the unity that we achieve by building the temple. And in this course, it's very important that when the temple of the trinity of the purpose is built, then the triple experience is collected. Family is personal experience (manas), kin – the collective experience (buddhi), and national – the national consciousness (atma). These three circles are the energy channel for bringing the consciousness to the new quality level. Support of the balance in management, most notably, is the balanced development. In all world

cultures these three circles have been present as the triple experience, which is collected by any system when a transitional process, or exactly the inversion, appears.

This transitional process provides what is taken into the core. The core is not a nation, not a territory, but an energetic formation, like an atom. It's the summit of the pyramid where the world of causes opens, which is called the Chalice of the mother of humanity. And the 12 civilizations together are known to many as the Lotus of the world. This is the same process as the cyclic development of humanity and the pulsation of life [3]. This way, the collected experience is transferred to the world of causes, where, having been synthesized, it's then returned to the humanity as the new program. And again, this cyclic process occurs in nature, and again the expansion is repeated. Humanity of different levels goes through its development, expansion, and then again synthesis, again the collection of stones.

In this sense, Universology is exactly necessary because the extraction of the experience is the most complicated part. For this it's needed to look at the first civilization – the Hyperborea, and its tree of life – Yggdrasil, to see that there was Midgard, Asgard, and the crown of the tree as that same stellar temple of the Solar world. And this triple experience exactly contains the meaning of the development. The experience of building the national temple as the root system, the experience of formation of the 12 civilizations of Midgard, and the experience that is Asgard, Heaven, or Shambala. That is the upper level of filling of the chalice of achievements, or the formation of the torsion field. Based on this process, the future system will be created, the seed of this new system. And this is what will be realized in the life of a human by the creative impulses from the world of causes – by so called “Seeds of the Spirit”.

It's so important that when these seeds start to incarnate, then the system of the new life is started to be formed, literally the system of the new life is being conceived. This is what we today are suggesting in the Lotus of the World to make humanity find common systems of development, to extract this triple experience from the 12 civilizations. There occurs the synthesis of all the 12 civilizations – the great Hyperborea, Belovodye, Altaic, the great Tartary, Chinese, Tibetan, Indian, Babylonian-Assyrian, Persian, Greek-Roman, Anglo-Saxon, and the 12th – Slavonic. Perfectly these are the 12 qualities, but they have their real content, and it must be transferred to the cradle of humanity, the Indian civilization, where all cultures are reflected.

Exactly there, like in a fairytale about the small seed sown by a good woman, the Lotus of the new time will grow, the new program, the new life, that same flower with the Thumbelina, or the soul of the new life. This is what it's so important for humanity to do today.

Thus, this is the universal process that we describe, which in fact was known in the entire world culture as the pulsation of life. Accordingly, in the beginning the world has been formed by the expansion and cyclic transition from one civilization to another, until it achieved the new quality state. When the 12th synthetic stage is formed, the transitional process occurs, and all 12 should collect their experience. This collected experience will be the base for putting these achievements to the cradle of the world, the 7th civilization, where the new meaning for the new temple of life will be born. The new program will enter as the energetic influence on the consciousness of people, and what should be born, will be born – the unconscious internal motivating pursuit of the dream about the new life, about the unification of the three primary sources of life that are always moving a human, about the three dreams, about the unity of bright individuals, about the equality of the values for relationships, about the people appreciated for their creative initiatives, who will create the freedom of choice and the new world of new relationships that will create new possibilities and opportunities.

This is what has always been in all the cultures, the higher trinity, the higher dream of development that contains the formation of the new temple of the new life in our age. We only must build this universal process by extracting the experience of cooperation from all the 12 civilizations, by collecting this experience, the 12 crystals of experience, and by putting them into the common source, into the cradle. And for this, the ones who are carrying this experience, this circle of people – the Kolo, should gather and enter the new world, the 7th civilization, by creating personal, collective, and social relationships with it. This is that same temple of life which will be the seed of the new development, and then in the core of the Lotus of the world the conditions for the birth of the new temple of the new world will be born.

What we say is beneficial for everyone. There is no more balanced development, as has been suggested before. Now a deep synthesis process is really required on the energetic level of the formation of the new program. It means that people have no image of the future, although the image of the future is so simple. The spirit of the new age by means of universal technology has already brought the knowledge that there are goals of discovering the internal world of all what is going on, the purpose of all the things to come, including people, groups, and societies. Based on this foundation, there should occur the formation of the integrational process of the collective strategy and the unification of purposes, which will create the multi-level collective process of the social self-management. And this will be the new nature-oriented way of life, this will be the new world that will create the new human.

These are the bases of the universality of the formation of the process that occurs now, especially in the period when Pluto entered Aquarius. It means that by this time the transitional process is completing, and the transformation is started, because Pluto itself is the 10th planet, it represents Aides and Tartar which is opening before the world, or vice versa, the new world will open as that same Asgard of the new life. The choice is left to humanity.

We are suggesting to the entire humanity, to everyone, to build exactly this pulsating process of collection and synthesis of the experience of humanity, based on the peaceful coexistence. This will form the harmonious process of cooperation. And this will be the evolution in peaceful coexistence. Everyone will continue their development much more effectively because this integrational process will give benefits for all. The main thing is that the world will become stable and organized; a human will become wise regarding his life and the surrounding world, he will open the portal of new opportunities, and the new temple of life will be opened for a human, who would have made his choice and take the path worth of his higher title – to be a human pulsating in the rhythm of the heartbeat of the Universe, to be heartfelt as a bright individual, happy in relationships that are forming the deep cooperation which, by building the temple of life this way, will all the time be able to form the tree of life of transitional processes into the new quality state.

This is what the universalities describe, and what we are already literally fulfilling today, by bringing together these people who are extracting the family, kin, and national experience. And we are helping them to do that with our universal technologies. And this way, by putting this experience into the great Kolo of Rassenia, we are collecting the 12 crystals of the experience of every civilization, and putting them into the cradle of humanity, India, to make the seed of the spirit of the new age to be born there, and to create accordingly the new temple of the new life with the new program.

This is what we are suggesting, and this is by its meaning the process unique for our age, and at the same time, the universal process of the pulsation of life. And the heart does this every moment, while we do it on a larger scale. Let's live together in the rhythm of the heartbeat of the Universe, as exactly this is our future!

THE TRANSFORMATIVE POWER OF NEW EPOCH CONSCIOUSNESS

International Scientific School of Universology brings to mankind a new cause-system worldview and a new interdisciplinary science of synthesis of world culture. That reflects the fullness of cause-and-effect relationships in the Universe and on the planet. Universology and the methodology of universal patterns based on the universal algorithm of the Laws of Nature.

Our research, experimental and implementation work is aimed at revealing the inner world of a person, achieving a new level of culture of socio-economic relations originated from collective strategy as a part of multi-level system of self-organization, including a system of public self-managing of a new way of life for a person and society, more efficient work and environmentally friendly production.

The postgraduate school of the International Scientific School of Universology creates the Image of the Future multi-level education system that gives the basis to research, experimental and implementation technologies:

- corresponding to the universal algorithm of the Laws of Nature,
- promoting the spiritual growth of man and
- formation of transition processes to achieve a new level of culture of socio-economic relations in the world,
- creating a multi-level system of self-organisation, including a system of public self-government as a new way of life for Human and society.

The postgraduate department trains scientific and pedagogical personnel in the education system of the International Scientific School of Universology after studying at the University of Universology and Psychosystemology and passing all the refresher courses in the International Scientific School of Universology. It implements the System of Continuing Education for International Evolutionary Movement members, training and retraining highly qualified scientific personnel in specialties represented by 7 Direction Institutes:

1. Institute of Universal Forecasting
2. Institute of Sociosystemology
3. Institute of Universal managing
4. Institute of Development of Unconventional intellection and human consciousness inversion.
5. Institute of Universal development technologies

6. Institute of Universalities of health
7. Institute of Universal space modeling.

Institutes experimentally implement universal models in various areas and spheres of life. The main goal is to introduce into society a new causal-systemic worldview and a new interdisciplinary science of Universology and the methodology of universal laws based on a universal algorithm for the operation of the Laws of Nature.

Object of Universology: Cause-system structure and balanced improvement of human and planetary being.

Subject of Universology: The universal scientific world view (USWV) as a universal for the balanced development of systems in the process of coordinated improvement of life.

Research hypothesis: The whole world is based on universality and nothing exists outside of universality.

The algorithm of action of the universal laws of nature as the reason for the origin, development, unity, synthesis and transformation of Life systems (a pyramid of laws with its causal part) based on the balance of the 4 elements of the forces of nature in relatively simultaneous peaceful coexistence and coordinated improvement of life systems.

The difference between Universology and other sciences.

Disclosure of the universal causal-systemic foundations of the structure of existence, which allows us to predict and model development processes.

International Scientific School of Universology (ISSU) - voluntary public association of people conducting educational and research work. It was created in 1994.

ISSU united hundreds of collectives in different countries – Ukraine, Belarus, Russia, Poland, USA, Italy, Germany, Turkey, Finland, Israel, Slovenia, Bulgaria, Iceland and others.

They conduct research, education and production activities based on the universal approach.

1. Creation and dissemination of the synthesizing and universal Teaching of the New Epoch and the causal-systemic worldview - UNIVERSOLOGY, as the creation of conditions for the formation of the 6th Root Race. Restoring the Axis of the Spirit to increase awareness and responsibility for humanity to become part of the Universe, creating the Image of the Future World of new opportunities, transforming the modern world into part of the Stellar Temple, nurturing cosmic consciousness.

2. Creation of the core of the synthesis of 12 main civilizational achievements in the unified energy system (UES) of the 5th Root Race with the

subsequent transfer of the development impulse into the space of the future 6th Root Race. The evolution of collective consciousness as a unity of bright individuals in the social-hierarchical self-government of collectives. Combining the experience of related peoples in the emerging 12th Slavic civilization and creating a hierarchy of stages of human evolution, completing the synthesis of the experience of 12 civilizations and forming the Lotus of the World. Creation of the Society of the Future.

3. Formation of a new socio-economic way of life, corresponding to the Spirit of the New Time and the ideals of the Age of Aquarius. Creation of the Image of the collectives of the Future, education and training of leaders of a new formation, coordinating their actions in a collective strategy based on public self-government (PSG). The birth of Organizations and Enterprises of the Future, built according to the mechanisms of action of the laws of nature, on the basis of public self-government and collective strategy.

4. Bringing new knowledge to progressive humanity in the system of continuing education (SCE).

5. Teaching the language of the laws of nature, the universals of Being, in the Temple of a new Epoch.

6. Education based on a system of continuous education; Education of the Man of the future, a bright individual who lives according to the laws of nature, coordinating his actions in a collective strategy and social self-government.

7. Creation of the Image of Activities of the Future, creation of experimental sites - prototypes of a new socio-economic structure. Organization of the activities of Public centers (Centers for Public Initiatives, Cities of the Sun, Cities of Masters and Pyramids-Temples of the World) on the basis of public self-government and a collective strategy of cooperation of bright individuals. The formation of new areas of professional activity of people and the versatility of their creativity and development, the creation of new jobs and new professions in the activities of the International Scientific School of Universology, Cities of Sun and Cities of Future.

8. Formation of a nature-oriented, healthy lifestyle and the art of relationships consistent with the Spirit of the New Epoch. Creation of an Image of relations of the Future, built in accordance with the ideals of the New Epoch and universal knowledge of the laws of nature, considering the purpose and uniqueness of each person.

9. Creation of the space of the Future for International Evolutionary Movement, awakening, revitalization of Power places connecting the Heavenly and Earthly, construction of Cities of the Sun, Cities of Masters, Temples of the World

(especially in the form of pyramids to create a Joint Energy System of the regions of the continents of the planet), Public centers based on public self-government and a collective strategy of bright individuals living according to the laws of nature.

Universology is the Spirit and the Paradigm of New Epoch. We could define it as

- Philosophy – the doctrine of the causality of existence, synthesis and meaning of life. Philosophy of epistemology of relativism, causal-systemic holism, hierarchy of systems, integration-inverse processes
- Interdisciplinary Science - a synthesis of the achievements of science and world culture to substantiate the essence of a new way of life. Universal scheme of action of the universal laws of Existence
- Methodology - universal methodology of the cause-system approach, universal modeling, integration-transitional approach. Practice of a balanced, healthy, nature-oriented lifestyle
- Model of the Future, how to dream and turn dreams into Images of the Future.

The following dissertations based on Universology were defended in different high schools of Ukraine.

❖ **Serbynska (Khojnacka) Tetiana Oleksandrivna**, UDC 35.01:303.094.7, **System-level analysis and modeling of the subjective component of public administration**”, 25.00.01 – theory and history of public administration. Ukrainian Academy of Public Administration under the President of Ukraine, Department of Theory and Philosophy of Public Administration, Kyiv – 2004.

❖ **Tsipurinda Vladimir Stepanovich**, **“Management system for trading enterprises based on an innovative approach”**. **Perspective scientific- research
and experimental-implementation directions in
Postgraduate Department of International Scientific School of
Universology**

The new scientific paradigm of the New Epoch describes a NEW MANIFESTATION OF HUMAN HAPLOGROUP of the elements AIR-WATER: flexibility and activity, unity and transformation, tenderness and integrity, gentleness and inevitability. There is a tendency for UNITY OF BRIGHT (revealed by purpose) INDIVIDUALS, RECONCILIATION and PEACEFUL COEXISTENCE of all forms of life.

Sensory-logical knowledge of the world, based on intuitive methods of scientific search, the significance of symbolism and its interpretations according to the universal algorithm of the laws of nature.

A mathematical picture of the world based on a cause-system approach solves the eternal problem of the isolation of mathematical modeling from the practice of life. Our specialists from the International Science School of Universology have begun the process of understanding the description of the mathematical apparatus in the USPW (universal scientific picture of the world) on the basis of universal models. Their theory describes the principle of factuality in the construction of the world, and the principle of the golden section justifies transition processes between the levels of the system. We are beginning a meaningful filling of the mathematical, astronomical, physical and chemical picture of the world as part of the USPW. Natural science becomes causal!

Restoring time channels through the restoration of the lost history of mankind.

Three stages of gaining experience:

The first stage – creation of life condition

The second stage -relationships of life elements

The third stage – coordinated development

The Slavic-Aryan Vedas tell that 115 thousand years ago the great Clans, who came from the stars about 500 thousand years ago to the 5th Root Race to stimulate its evolution, to resist evil and save humanity, created the Great Circle (Kolo) of Rusenian. The Great Kolo is the United Energy System of people who have absorbed the 12 meridians of humanity as the experience of the 12 Lotus civilizations of the world. This created the Protective Circle of Peace. Dispersion is the spread of the impulse of creation of the 5th Root Race along 12 energy channels-meridians-pillars of the world. Having collected 12 qualities of energy flows-meridians, it will become possible to focus the synthesizing flow at the top of the pyramid of the Lotus core of the world of 12 civilizations and open a Portal to the world of causes to the Hierarchy of Light, which then entered the Army of Light led by Perun into our world of Reveal and cleansed it of darkness, sealing the door of the lower worlds, behind which is evil. Then the world was saved in the Joint Energy System. And now in the same way we need to go to the salvation of the world, mobilizing all the forces of Light of the

Aquarian era. To create an energy channel along the Axis of Spirit for the entry of the energies of Jupiter and saving the world from darkness and the forces of chaos, we are building a GREAT KOLO of peaceful nations and laya centers for the unity of people of good will!

HOLISTIC WORLDVIEW IN EDUCATION OF THE NEW AGE

Speaking about the Education of a new era, we envisage, first of all, the birth of the man of the Future. This personality's worldview is expected to demonstrate integrity. Such integrity may be provided by universal multi-level integral education.

The quality of Integrity, which defines life itself, is considered the focal concept of the education which essentially helps a person to find their way in life, according to their destination.

The world is structured strictly hierarchically, and all levels of the world order correlate with one another from the macro to the micro world. This correlation also concerns their functions and place in the universe, so a person finds himself along the Axis of the Spirit, according to the purpose in which he is realized in life in macro and micro systemic relationships, which shape his energy-informational structure. This is how he finds the answer to the three most important questions - who am I, how the world works and how relationships with this world are built [2].

The suggested model of education is hierarchically structured, nature-oriented, and continuous. This approach allows us to build the stages of revealing a person's purpose, and an algorithm for transforming a person along this path.

The main task of education today is to bring God back into Education. What does it mean? God is the reason for human life. This means that the task of education is to reveal the reason for the life of each person, to find his place and role in life, in the universe, and imbed this understanding in his holistic worldview.

Education should provide connections between inner and outer worlds of a person. This idea of integrity is based on analogies found in the traditions and cultures of the world, in mythology, legends and tales: an example is the Tree of Life, as a symbol of the connection of the internal and external world of a person, clan, people, humanity.

There are three important goals of education:

- the formation of a causal-systemic worldview (comprehension of the systemic nature of the world order),
- systemic-logical thinking (the stage of growth of human consciousness),
- a sensory-logical worldview of a person (a way of connecting the internal and external world in the heart, heartily education and true humanity).

Space, time, energy - three parameters of education.

The universal multi-level education is based on the model of the Universal Scientific Picture of the World (fig.1). This Picture of the World combines two components. The natural

scientific one provides knowledge about the structure of the world. The social and humanitarian component conveys patterns of the world’s cosmological and historical development. Both components comprise the causative segment of the model, which is fully implemented in various spheres of socio-technological activity [1].

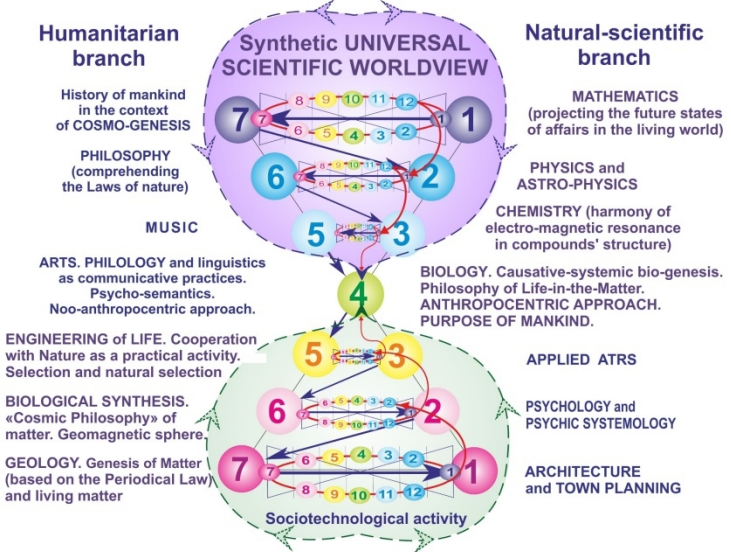

Figure 1. The model of the Universal Scientific Picture of the World

The connection of internal and external, cause and effect - this is the function of the heart. The Earth is the 4th planet from the Sun, like the heart of the Solar System. Humanity is the 4th kingdom of nature like the heart of the planet. The essence of education is to reveal the image of God in human, radiating it into the world through the realization of his purpose. The essence of the new education is to build a bridge between divine authenticity and earthly reality.

Integral perception of the world is based on a causative-systemic worldview, an understanding of the nesting of small and large, subsystems in a system, systems in a supersystem, etc. According to Aristotle, all spaces are placed inside other spaces, and all times are located inside other times. This is the systematic nature of the world-building, its hierarchy.

According to the same principle, human development occurs at 7 levels of systemic relations with the world in 7 spheres of its manifestation, which constitute the space of his life at: psychophysical, emotional-sensory, mental, social, collective, hierarchical and ideological levels.

Our education system suggests stages of training that follow the logic of universal laws of nature, as stages of the development of natural systemic-logical thinking - concentration of thinking, linear (establishing relationships), planar, three-dimensional and systemic thinking.

Thinking according to the algorithm of the laws of nature allows us to reveal the volume and integrity of the vision of any phenomenon or process.

By volumetricity we mean a multi-vectored vantage point implemented by a researcher. Please consider the illustration from the video. The volumetricity of the perception of the world underlies the understanding of the flow of life as well as flow-like education.

The axis of the Spirit, to which a person tunes in his consciousness, allows him to connect with the Inner world, which becomes its external manifestation.

Today, mathematical theories prove causative systematicity and hierarchy. For example, mathematician Kurt Gödel suggested that every system must have a reason for its development. Mandelbrot formulated the theory of fractals as the repetition of the big in the small.

The systemic construction of the world and man unfolds in time, as in the stages of accumulation of development experience. The 12 stages of human development at each of the seven levels of relationships are manifested from the macro to the microcosm. Respective processes synchronize and repeat the same fractality. The function of the 4th level of the planetary, human, determines the main support in education - the education of warmth. 12 petals of the heart center, each of which has its own characteristics and functions: 12 zodiac constellations, 12 meridians of the Earth, 12 civilizations of our root race, 12 meridians of the human body, 12 pairs of cranial canals in the central nervous system.

This is an illustration of the fact that nature-oriented education in our system offers the living of educational material, reveals the essence of nature-orientedness and its flow, creates conditions for the formation of the necessary human qualities in three circles of development - manas (space of life), buddhi (interconnections), atma (coordinated development and control).

For this purpose, within the structure of the International Union of Universities of the International Scientific School of Universology, the following educational structures have been created: the School of Systemic Worldview (SSW), the College of Universology and Psychosystemology, three courses of the University of Universology and Psychosystemology, the highest personnel school is the Postgraduate School, and doctoral studies are planned in the future.

In our educational system, we offer the same phasing for each year of study in the seven-year period. This can be represented as 12 modules of a person's annual training cycle, which is the basis for the continuity of his education.

Continuity is that in each cycle the universal stages of development are repeated but at a deeper level on different subjects. The movement comes from knowing one's place and role in the macrosystem to knowing one's purpose and understanding integration with others in order to create this integrity of the movement of energy flows in the overall system of humanity.

This is like a double helix is formed (similar to DNA). One is the ideological basis that builds the Axis of development. The second is the content of the items, according to the stages of the cycle.

A clear organization is formed, like a hierarchy of life:

- From consumerist attitude to vitality.
- From emotions that suppress others to a balance of emotions that allow you to adequately understand the world.
- From a scientist-genius who knows a single truth to one who can see the positive in positions and views different from his own.
- From replicating a template set of knowledge to the formation of a multidimensional personality.
- From the charisma of a boss to the charisma of a democratic manager.
- To the charisma of mahatmas.
- To the charisma of the Leader.

The system of continuous education presupposes the path from the individual experience of such flow by the teacher himself to the experience of flow in teaching others and investing the value of what has been lived into society.

Thus, our system of universal-international multi-level education allows us to form a flexible system of interaction between educational, academic, research organizations. It aims at the evolutionary development of man. It combines continuity, nature-oriented education based on self-organization in public self-government. This allows us to form a system of additional education for adults.

Then, on the basis of a causal-systemic worldview and integral worldview, systemic-logical thinking, a sensory-logical perception of the world is formed. The practice of sensory-logical world perception allows a person to tune in to the high frequency of vibrations of the New Epoch. And the practice of creating a United Energy System will reveal the essence of the pedagogical resonance between teacher and student.

The inner world is brought into the outside in the attunement of a person to his destination along the Axis of the Spirit [3]. The resonance of energy flows forms the integrity and harmony of the person himself in the balance of the 4 Elements in all areas of his life.

This is how the algorithm of sensory-logical perception is built, as the entry of the internal into the external, the meeting in the heart of Thought-Image and Thought-Form, which gives birth to Thought-Feeling. Both halves of the brain are involved - figurative and strictly logical functions. Let's try to test ourselves to turn the ballerina's rotation in the other direction.

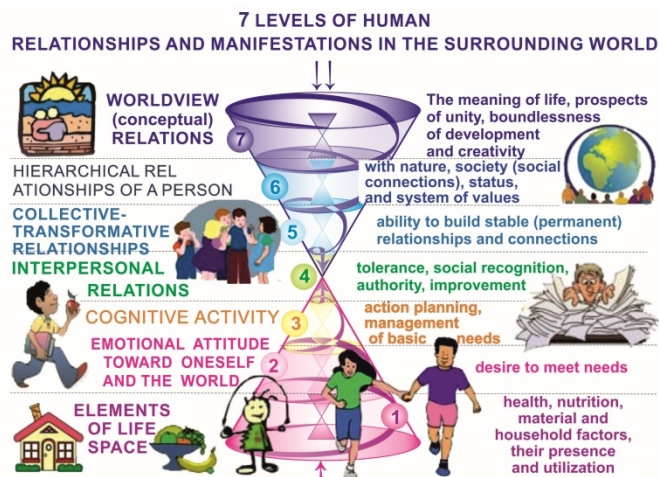

Figure 2. Seven levels of human manifestation in the world.

The basics of the system of universal multi-level integral education are outlined in the Doctrine of the universal education system of the International School of Universal Education, where 7 main directions of education are revealed in accordance with the 7 levels of human manifestation in the world (fig.2).

We are now presenting to your attention a holistic model of the education system in the new era, based on a worldview Axis, along which, like the Tree of Life, a rainbow bridge is formed to connect a person with his inner world, directing him to the Future and purifying the past, and this meeting takes place in the Heart.

The Man of the Future is born, the Man Creator, the Man who transforms himself and the world. Examples of the implementation and practice of this system of work will be revealed in our subsequent speeches.

INTERNATIONAL UNION OF ACADEMIES

International Union of Academies is represented in seven countries of the world and more than fifty cities.

The International Union of Academies is engaged in the practice of embodying the application of knowledge of Universology.

The Academy reveals the meaning of life and teaches consistency in the realization of Goals with other structures.

Forms implementation platforms for the application and implementation of universal models in education.

The esoteric essence of the Academy is to promote the progressive part of humanity to enter the White Lodge of Shambhala, through the organization of the stages of spiritual and professional growth of students of the Hierarchy in the practice of serving the world.

Our Union of Academies:

- is a life practice that brings the image of the future closer,
- is the implementation of socio-economic programs and the organization of research activities,
- is the provision of personnel,
- is the selection of students in the system of continuing education with their subsequent employment,
- is the development of the consciousness of the Human Creator through the technology of bringing to life the model of the evolutionary Future,
- is the growth and equality of opportunities for self-expression in hierarchical collegiality.

THE Academy IMPLEMENTS a practice-oriented educational program "Mental psychosystem modeling from the inner world to the world of the future." This program develops non-standard imaginative sensory-logical thinking through the formation of an Image of the Future.

A new profession is a specialist in universal neurogologram modeling.

The Union of Academies IMPLEMENTS the educational program "System of Public Self-government".

The program ensures the effective organization of society's life through a collective strategy.

The new profession is an Ambassador of Peace, who knows the art of balanced (nature-oriented) self-organization of public and international relations.

The Union of Academies IMPLEMENTS the educational program "The Protective Circle of the World". The program contributes to the creation of an Eco-Balance of the Planet, a single program for the coordinated development of all kingdoms of nature and the world community, where universal goals and values based on the Laws of Nature operate, where each person and team embodies their purpose.

The International Union of Academies creates Laya Centers, Cities of Masters, Cities of the Future, Cities of the Sun, enterprises of a new type in different cities and countries of the world. It implements a system of public self-government in life and cooperates with the public.

We create an image of Unity, hold forums and festivals of world cultures of 12 civilizations.

We hold conferences, round tables, debates, and public universities.

The Academy's research teams discover places of power through conscious travel.

HUMAN SPIRITUAL GROWTH THROUGH THE SCALE OF COLLECTIVE CONSCIOUSNESS

Coordinating Council of the Scientific School of Systemic Worldview (SSSW). Mass public organisation, unites progressively thinking people.

We form collective consciousness on the Planet through unity of people and formation of creative Image of the Future.

- We reveal the uniqueness and creative potential of a person;
- we help to integrate into the work of a team, collective, society.
- through mentoring we guide through the steps of spiritual development on the Path of Discipleship.
- unite different peoples and cultures for the sake of building a society in a new era.

Place in the System of Public Self-Governance.

The Coordination Council forms the space of manifestation for the disclosure of the Spiritual Path of a person.

The isoteric essence of the Coordination Council can be seen in the model of the System of Public Self-Government, in the 3 circles of the system's development.

The Coordination Council corresponds to the Circle of Manas, stages of discipleship - Enlightenment.

Expansion of consciousness and comprehension of the values of the Brotherhood: building relationships on the principle of human love and equality before God.

We also develop in 3 circles of life.

Manas - body manifestation of SSSW,

Buddhi - we are active in serving and interacting with the world around us - we are the Breath of SSSW.

Atma - we become creators and bring novelty and transformation to the world - we are the Heart of SSSW.

And we guide Man through the stages of Discipleship in 3 circles of development.

From the Aspiring Disciple To the Path of Service. To the permanent image of the Teacher in the Heart of the disciple.

The stage of team development.

A connection to the higher. An aspiring person.

Building a unified energy system entry level. No person can travel the path of personal growth without working in a team.

At this stage one builds a cordial relationship with a person. We get to know his interests and help him discover values for the world.

We include them in specific activities related to professional and spiritual development.

There are three stages of team development:

- A group of people inspired by a common idea (goal) is formed. This is the initial and impermanent unity of people, in which there is no hierarchy in the structure of relations. People come together for a common cause, but goals remain individual.

Expansion of consciousness.

We build a system of mentoring and keying into the common affairs of the hierarchical collective. *2nd picture*

This is where the individual forms their collective cause, which develops the individual, the team and the larger system. *3rd picture*

The exchange of results, the achievement, the building of the City of the Future. This is how the human consciousness opens up in the collective field, the birth of collective consciousness, the expansion of the consciousness of the universal human planetary and stellar consciousness.

Concentration and Synthesis of Flows.

A person with the results of his/her team's activity is included in the System of public self-government of the Cities of the Future development.

He exchanges team achievements with other teams of like-minded people in common collective co-creation.

A person's transition to the next stage of spiritual growth on the Path of Discipleship is the possibility of inclusion in the permanent collective co-creation corresponding to the circle of Buddhi.

Exchange of results of achievement, System of public self-government, construction of Cities of the Future and Civic Centers.

This is how the human consciousness opens up in the collective field, the birth of collective consciousness, the expansion of the consciousness of the universal human planetary and stellar consciousness.

As a sample of the technology of building heart relations and collective strategy.

Our Cities of the Future.

According to the principle of building Unified energy system on the basis of Collective Strategy, spiritual groups are being created, our Laya centers are located all over the world.

Pay attention to the geography of the area of activity of our groups, from Baikal to Western Europe, USA, Israel.

On the territory from Belarus to Baikal, 16 cities of the future based on System of public self-government have been built.

Vibration Passport

Our internal energetic structure. The system of hierarchical formation, each collective occupies according to its place and role in three circles of development of the general system of IEM -International Evolutionary Movement.

Our whole system is alive and in constant development and integration with the world.

Thus, in rhythm and persistence, our activities form a new socio-economic pattern for the peaceful coexistence of all on earth.

In order to guide people through the stages of Discipleship, to help them realise their purpose and find opportunities for co-creation, we hold courses on the study of the Path of Spiritual Development, Sign Symbolism, the study of Destination, the education of the Leader in a collective strategy.

Coordinating Council Axial Courses:

"The Path of Spiritual Development in the New Era."

"Signs of Destiny. Signs of change. Symbols of Success."

"Destination in the New Era."

"Leader in the New Age."

We invite you to co-operation in forming a new Human haplogroup Aquatic and building Cities of the Future.

UNIVERSAL STRATEGIC FORECASTING OF THE WAY OF DEVELOPMENT

The creation of life on the planet occurs in cycles. The energy of the creative thought (or idea) manifests through 7 basic types of energy – Rays. On the involution phase of the cycle the idea descends into the substance and creates the form of its manifestation. At the stage of evolution - creation and expanding consciousness ascend.

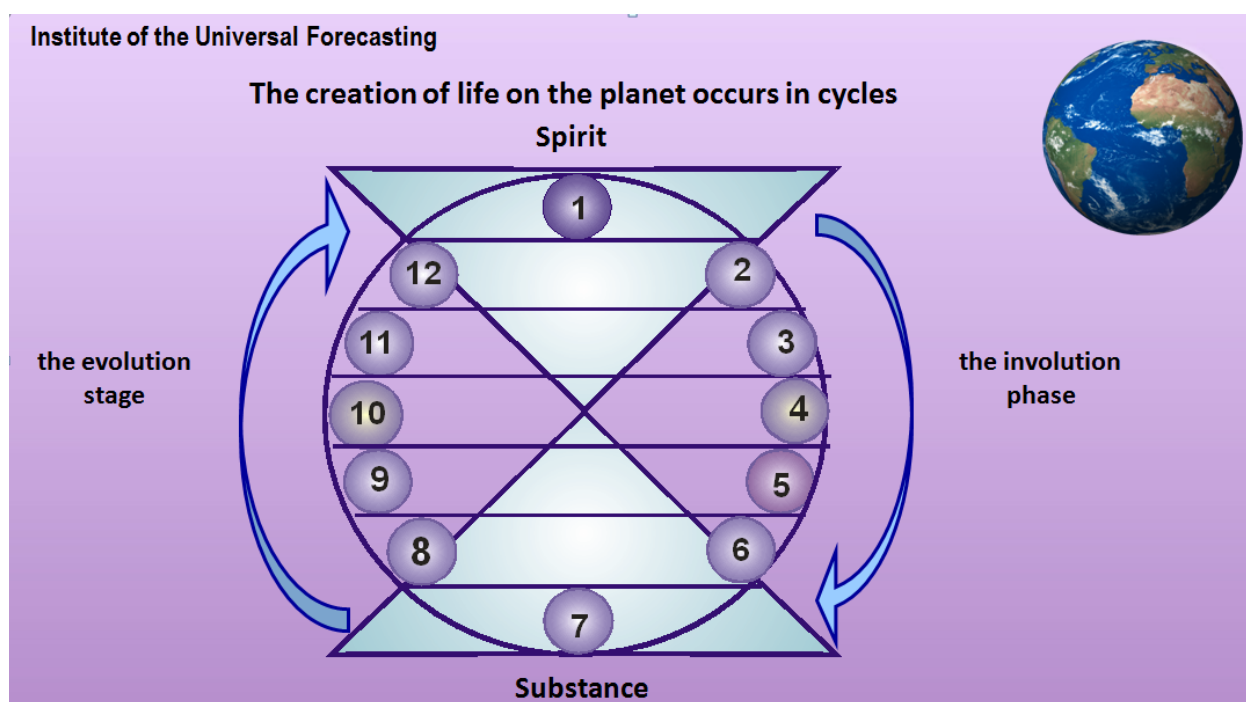

Figure 1. The creation of life on the planet occurs in cycles.

7 Rays manage the planetary evolution and the development of all forms of life. Every Ray has its own vibration and its own energy conductor. All 7 Rays together facilitate the evolution of the planet and humanity. The International Scientific School of Universology implements the ray strategy of the Hierarchy and conducts the Spirit of the New Age by realizing 7 strategic tasks through 7 Institutes of different ray specializations.

Rays:

the 1st Ray “of Will and Might”

the 2nd Ray “of Love and Wisdom”

the 3rd Ray “of Active Intelligence – Higher Mind”

the 4th Ray “of Harmony through Conflict”

the 5th Ray “of Concrete Knowledge – Lower Mind”

the 6th Ray “of Devotion and Idealism”

the 7th Ray “of Ceremonial Order”

Figure 2. 7 Rays of planetary evolution.

The presenters on the first day of the conference demonstrated how the Flow descends and how the idea materializes in substance. The presentations by the 1st Ray Institutes will illustrate the ascent of experience through the practical implementation of the idea.

Presentations of Ray Institutes will demonstrate the ascendance of the experience of the practical implementation of the idea

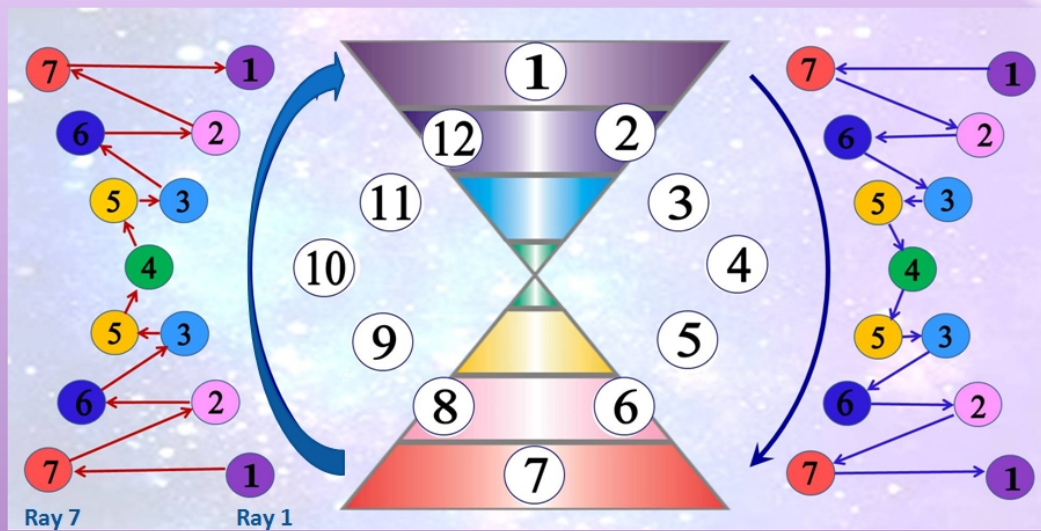

Figure 3. The practical implementation of the idea.

Currently, humanity is undergoing several transitional processes, such as the shift from the Age of Pisces to the Age of Aquarius. During this period, we recognize that

old goals and values are no longer relevant, but new reference points and objectives have yet to become clear.

The humanity needs the Image of the Future, the new paradigm of development! The transitional process is complemented with the active manifestation of the 1st Ray through structures that resonate with its qualities. Institute of the Universal Forecasting implements the functions of the 1st Ray through its directions of activities, technologies, and methods.

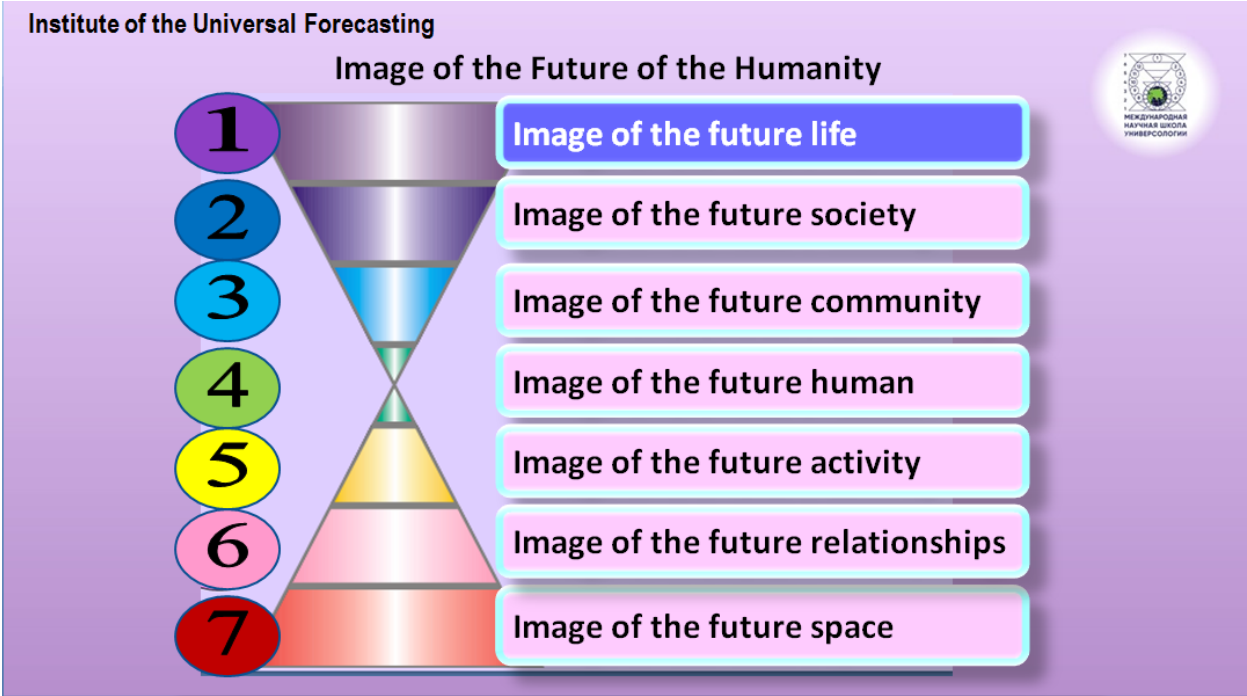

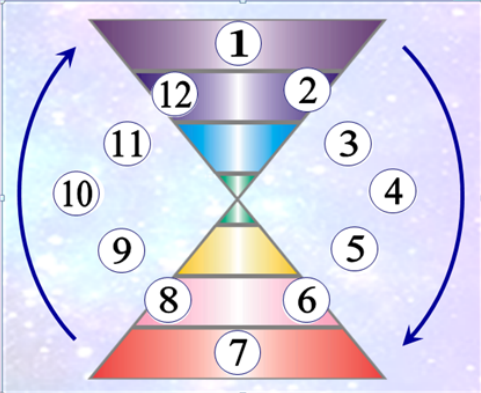

Figure 4. The Image of the Future.

During the transitional processes, when one cycle is completing and the other just starting, the 1st Ray of Will and Might comes into the activity. On the descending phase, the 1st Ray cleans up the way for the Flow of thought (or idea) by destroying old and outdated forms. The 1st Ray is a Will that advances the plan of the Logos.

During the ascending phase, this Ray gathers, unites, and absorbs the entire spectrum of experience, including that of the other Rays. The 1st Ray brings order out of chaos. Over the full cycle of development, it guides the Spirit through matter and returns it to the Center from which the impulse originated.

WILL IN THE REALIZATION OF THE IDEA OF CREATION
1st Ray is Alpha and Omega, the Beginning and the End

The 1st Ray characterizes the Divine will of the realization of the idea of Creation.

The influence of this flow on the substance guarantees the clarification of the hidden goal of the Deity.

This is the Will that advances the Plan of the Logos.

This is the power in the expansion of the Divine Plan.

The 1st Ray brings the goal and the program of the development.

It gives the inspiration for the implementation of the program of evolution.

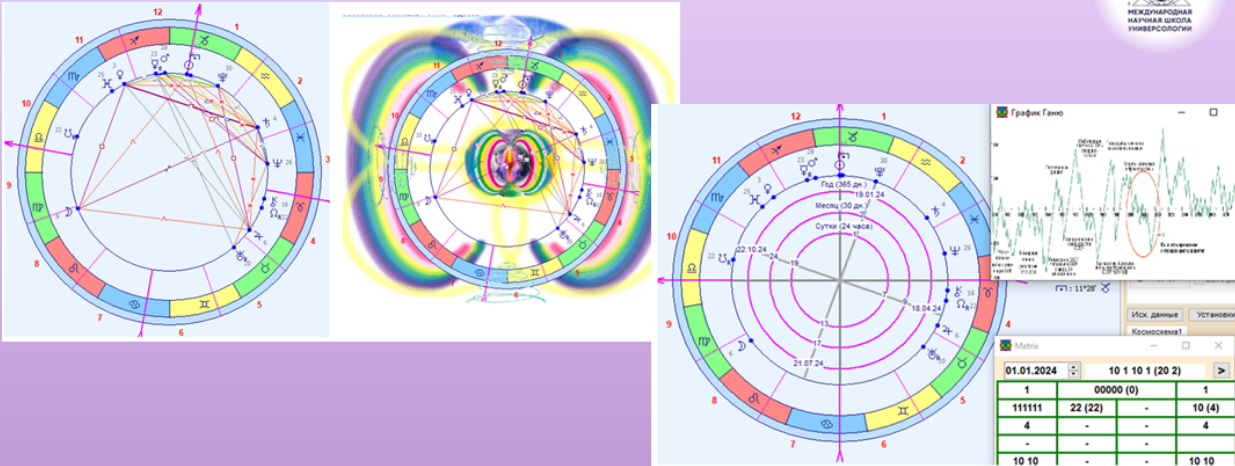

Figure 5. The full cycle of the development.

In transitional processes, within the rapidly changing environment, the need to foresee future events becomes more critical. This allows for preparation, consideration of both positive and negative consequences, and making the right choice in favor of the optimal development scenario.

It is essential to choose a development strategy based on forecasting. Forecasting involves identifying future trends in development, enabling us to anticipate the steps along the path toward upcoming events.

Institute of the Universal Forecasting **Forecasting**

Forecasting is the definition of future trends of development.

Forecasting allows us to see the steps of the path towards the events to come.

Figure 6. Forecasting.

The technologies of universal forecasting allow us to envision the Image of the Future, predict new goals, and determine the most effective path forward for individuals, families, societies, and all of humanity, in order to build a society aligned with the spirit of the new age.

The Institute trains unique specialists capable of forecasting goal reference points, trends, and outlining the steps necessary to create conditions for the non-crisis development of humanity, society, and individuals.

The program equips graduates to work in scientific, research, psychological, and recreational centers, as well as in enterprises, schools, and many other areas/fields.

Institute of the Universal Forecasting

The Institute uses innovative methods of forecasting based on the universal models developed by V.A. Polyakov.

The collage features several key elements:

- A large circular diagram with concentric rings and colored segments (red, yellow, green, blue, purple).
- A smaller circular diagram with a triangle inscribed within it, also featuring colored segments.
- A vertical diagram titled "7 шагов навстречу друг другу" (7 steps towards each other) with seven numbered steps and corresponding symbols (1-7).
- A grid of smaller images including a yin-yang symbol, a DNA helix, and various geometric patterns.

Figure 7. The courses program.

The thematic laboratories of the Institute provide opportunities for the creative development of its specialists, who conduct practical research on topics of interest that are in demand by society. Students can join communities that create forecasts, which are then published on social networks.

Figure 8. The thematic laboratories of the Institute.

The Institute is working with every student to explore the best sides of his/her individuality, on his/her philosophical understanding of the meaning of transitional processes, conflicts, crises and causes of events that are occurring both in the world and in his/her own life.

Thanks to the gained knowledges, studies and application of the universal forecasting, students obtain the Cosmic Conscience and the Spirit of a Researcher as a Creator of the New Age.

The Institute is preparing specialists in the field of the universal forecasting and works for the goal of a human to be able after the course graduation to organize his/her activity and provide the real support for the society and individuals in the definition of the most effective way of development and synchronization of the life of a human and of the society with the rhythms of the universe.

Specializations of the Institute of Universal Forecasting:

- Astrosystemologist (6 months of education, certification);
- Astropsychosystemologist (12 months of education, certification);
- Astropsychosystemologist-consultant (18 months of education, certification)
- Specialist in the universal forecasting (300 hours, UNESCO certification)

All the stages of the courses are provided with computer programs for the astrodiagnostics of abilities, health, forecasting of relationships and activities,

definition of the purpose, and finding the ways of the most effective realization of a human, community, and society.

Figure 9. Computer programs.

The Institute has a working community of experienced teachers who are well-versed in the philosophy and methodology of Universology.

Experimental fields for researches and practicing in different countries.

In the Cities of the Future, sessions and advanced courses for specialists are organized.

MODELING THE IMAGE OF FUTURE SOCIETY BASED ON UNIVERSAL TECHNOLOGIES OF HUMAN CONSCIOUSNESS EXPANSION

«Be the change you want

to see in the world»

Mahatma Gandhi

In the modern world, global problems and crises (as shown on the Figure 1.) undermine social foundations and distort moral values of development. Countries and peoples are losing their understanding of their place and role in the evolution of humanity.

The absence of a universal human paradigm and evolutionary strategy results in the disunity of nations and global disintegration.

In the New Era, humanity is faced with the tasks of evolutionary transformation of social processes and modeling the society of the future based on coordinated cooperation and inter-collective integration.

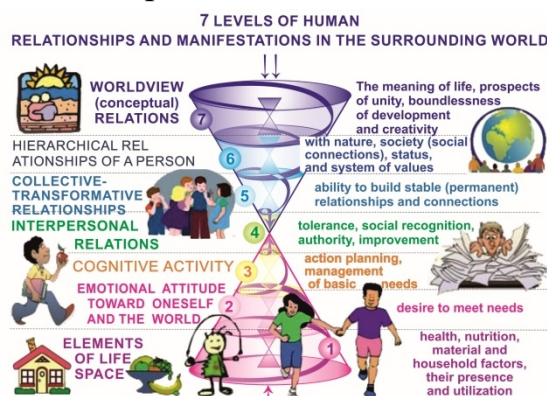

Figure 1. Seven levels of human manifestation in the world.

To solve pressing issues of humanity, the International Scientific School of Universology and the Institute of Sociosystemology have developed an evolutionary concept of the Strategy for World Community Development, outlined in the document called the "Manifesto of Humanity Evolution."

Based on the achievements of the ISSU (International Scientific School of Universology), the Institute of Sociosystemology has created and implemented innovative models and technologies for the development of the society of the future on experimental sites.

Mission, idea, program, product of the Institute of Sociosystemology create actual experience for implementation of innovative models and technologies for development of the society of the future.

Our mission is to contribute to the sustainable, goal-oriented, and spiritual development of the world community by involving every person in the process of society management. We create a Cosmic Magnet around the Spirit of the Aquarius Age Axis according to the ideas of Universology, translating the energies of Love-Wisdom to the world.

Our implementation program is the evolution of human consciousness through an idea, a product, and a way of life.

Idea: To form a unity magnetic field /to allow the program of the New Era Spirit in /and to create a society of the future/ based on the experience of 12 civilizations in the Lotus of the World synthesis.

Product: A complex program for consciousness liberation to model the coordinated society development in the Spirit of the New Era, "The Art of Being Free."

Lifestyle: To reveal a person's consciousness to the essence of his or her life purpose and mission, implementing the stellar program along three stages of evolutionary development: personal, collective, social. Modeling society of the future image in the community centers and cities of future.

Key approaches and innovative technologies of the image of the society of the future:

1. Hierarchical coordination/ of multi-level social systems and Institutes based on the UEIS (Unified Energy-Information System).
2. Formation of moral values based on universal human ideals and a synthesis of the 12 civilizations' experience. The programs are implemented in the System of Continuous Nature-Oriented Education.
3. Universal modeling of the evolutionary future is based on the system of public self-government (SPSG) and collective strategy. In the strategy implementation programs, we rely on universal models and laws of nature.

Research and implementation of the Institute's achievements are carried out at experimental sites in more than 12 countries around the world, in more than 100 teams in the centers of Public Initiatives and Cities of the Future.

At these sites, a prototype of the society of the future model is created and implemented, based on integration, cooperation, and value recognition of each nation, group, and individual.

A hierarchically coordinated complex approach is fundamental in creating society of the future image:

- To expand both personal consciousness and the consciousness of humanity from a look at the holistic “I” to a collective, social, universal, planetary, stellar consciousness.
- To form a universal, holistic world picture and value guidelines in the person’s mind.
- To reveal(и) moral, ethical, cultural, and spiritual potentials of an individual through a deep understanding of their mission on the Planet.
- A nature-oriented way of life in the opening of sensual world perception through the return of a man to his true (трус) Divine Nature.

Expanding human consciousness, we set the task to turn the strategic vision from the egocentric “I” to the adoption of divine strategy from above, from the star worlds and planetary tasks. A person, accepting the flow, harmoniously joins in and moves along the stages in the UEIS (Unified Energy-Information System). of the family, ancestral, national, civilizational, and planetary Tree of Life in the Lotus of the World.

- **UEIS** (Unified Energy-Information System) is a unique way of bringing people together, generating a new source of energy for the humanity evolution and for every human being.
- **SPSG** (System of public self-government), as an ideal model of the Society, like roots, absorbs all spiritual and cultural experience of people. Like a tree trunk, it develops the solution of pressing tasks of society. As a crown, it integrates supranational spiritual landmarks. (Figure 2. System of public self-government)

• Figure 2. System of public self-government

On the basis of the SPSG(system of public self-government) technology there is a merger of Families, Generations, Peoples on one territory (territorial self-government) into a single social program (social self-government) with the development of innovative integrated products (Self-management).

SPSG (system of public self-government) is implemented in complex programs: «Mission of the person, group, and society», «Art of being free», «System synthesis of 12 world cultures», festivals of the world cultures unity, practice of helping people through consultations, courses, seminars, distance education, scientific research in the following directions: Rodologi, uniology, social systemology.

To do this, we, in Public Centers and Cities of the Future, guide the person and gradually include him or her in the stage of collective strategy (group-team).

The person solves his or her problems, acquires the basic qualities of the new person (responsibility-discipline-aspiration-constancy), which helps them more consciously and creatively participate in the stages of the system of public self-government (territorial-industrial-social) by developing skills of self-organization for spiritual development.

Today, an important and relevant aspect in creating an evolutionary and nature-oriented image of the society of the future is the disclosure of the spiritual mission of the individual, collective, society.

We come into this world with a purpose to a specific place on the planet not by chance. We come to perfect the space of our birth, to fulfill the Mission of our Soul.

The exploration of the Mission is multifaceted. The Mission unfolds from the place of our birth in the Lotus of a person's life through 12 petals, from a seed to a fully bloomed flower. We create the Lotus of Life of 12 civilizations, shaping and uniting the Lotuses of individual people, collectives, and societies. A person reveals his/her Mission by exploring life in three age periods of 28 years each, traveling through the world, and gathering experience in a triadic ascending flow that fills the chalice of your Homeland's Soul.

The Soul leads to any space for the acquisition of valuable integration experience.

We have developed a scientific approach to researching the Mission of a person based on their place of birth:

1. Research Algorithm: "Mission of a Person on Planet Earth"
2. Computer Program: "Map of Conscious Journeys"

In the program, we input the date and place of the birth. For example, I was born in Odessa (the place of my Lotus Seed embodiment). The Lotus of my life unfolds from the birthplace with 12 Petals.

The Map of Journeys (Figure 4) displays all the cities and countries where my Soul guided me to accumulate and radiate experience during different periods of my life.

It's like a passport of cosmic vibrations.

Figure 4 *Computer Program: "Map of Conscious Journeys"*.

My example of mission research. India falls into the 5th petal of my Lotus of Life, under the sign of Leo. According to the date of my birth (1111(1)), I bring the experience of vivid individuality to India, filling the space of my manifestation with it. Simultaneously, I absorb the experience of the opposite zodiac sign, Aquarius (4), embodying qualities of novelty, non-conformity, and a flow of new relationships. I absorb the Divine energies of the hierarchy of relationships in India and will contribute this experience to the Soul Crystal of my birthplace – the city of Odessa, Ukraine. The Soul leads to any space for valuable integration experience and Mission revelation. In Germany, where I have been living for 2 years, I unfold the qualities of Aquarius (4) and contribute the experience to the 11th Anglo-Saxon civilization.

We all came from different cities around the world, and the Mission of this space has united us. Each person contributes the experience of their Zodiac sign and Birthplace to the collective energy flow of our conference and the space of India!

Together we create unity in the “Lotus of Peace” and in the real space of life we embody the image of a new image of the society of the Future!

Irina Evdokimova, coordinator of the Institute of Universal Management, an energy strategist, and a life management consultant, Russia.

NEW PARADIGM OF LIFE MANAGEMENT IN MODERN CONDITIONS

The transition process to a new era is accompanied by a series of systemic crises, including the crisis of uneven socio-economic development.

In accordance with the Spirit of the new era, a new paradigm of coordinated management and development of multi-level systems according to the laws of Nature is required.

Universal Life Management responds to the demands of the new era for effective coordinated life management in accordance with the laws of Nature.

Universal management is the process of creating optimal conditions for harmonious, goal-oriented development in accordance with the laws of Being, based on universal management models.

With the help of Universal Management, one can effectively:

- diagnose the state and adjust the development of individuals, social and economic systems,
- forecast their development over a certain period,
- model effective development management.

Universal management manifests the Esoteric essence of the 3 Rays: the Ray of Intellectual Activity of Spirit in Matter, embodying the strategy of the 1st Ray of Will and Power, and the 2nd Ray of Love and Wisdom.

The task of the 3rd Ray is to awaken matter to the perception of Spirit and cooperation with it. Like a Great Architect, it organizes and distributes the unified flow of creative energy into individual sub-rays, ensuring the realization of the Creator's plan in matter. It unifies and synthesizes the accumulated experience in matter ascending towards Spirit.

The 3rd Ray stimulates human activity as a co-creator of planetary evolution. The energy of intellect manifests through creative activity and is reflected in collective strategy.

Life management ensures the integrity, multi-level nature, and coherence of human-collective-society development. It helps improve the quality of life and incorporate natural processes of renewal and growth.

We build life management based on universal management, and universal management itself is built on the mechanisms and algorithms of the laws of nature and the inclusion of humans in the hierarchy of life systems.

Universal life management manifests in space, time, and the accumulation of energy reflected in universal management models. It develops in three circles of experience accumulation: personal Manas, collective Buddhi, and societal Atma.

Correspondingly, a person reveals themselves as:

1. A skilled performer - a good specialist - Manas
2. An excellent organizer - a wise leader - Buddhi
3. A spiritual leader - Atma

Universal management helps shape the image of future collectives. [3]

Let's consider a system complex together:

Where the subsystem is a person, the system is a collective, and the supersystem is society.

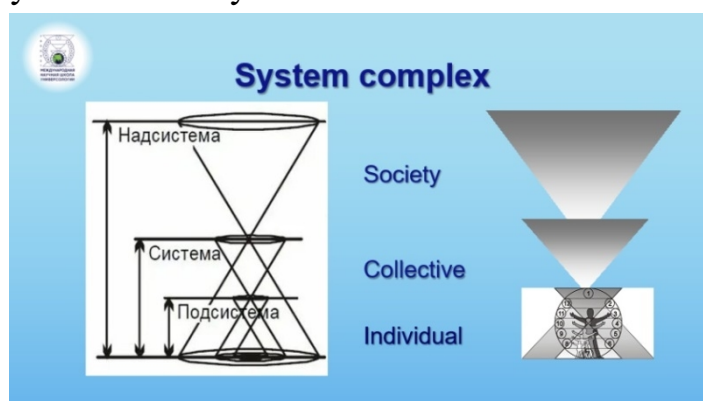

Figure 1. System complex.

In order to form a society of happy people, we need to create collectives from which this future will be built.

In this period of time, in order for a person to accumulate full experience, they need to become a unifying element in 5 types of collectives:

- 1 - family, where you were born, your parents, siblings,
- 2 - your own family, spouse, children,
- 3 - a professional or work collective,
- 4 - a collective of like-minded people following a spiritual path, your hobbies, interests,
- 5 - a group of friends.

It is good when we can connect or unite these collectives in our lives.

Universal management will help those people who see and build their lives in collectives where the main principle is coordination and cooperation, because that is when a person develops and fulfills their purpose.

If you want to live in a society of happy people, then let's understand how to create these collectives of the future.

Of course, based on universal management!

Universal management is based on 4 management models and their various modifications [1] [2]

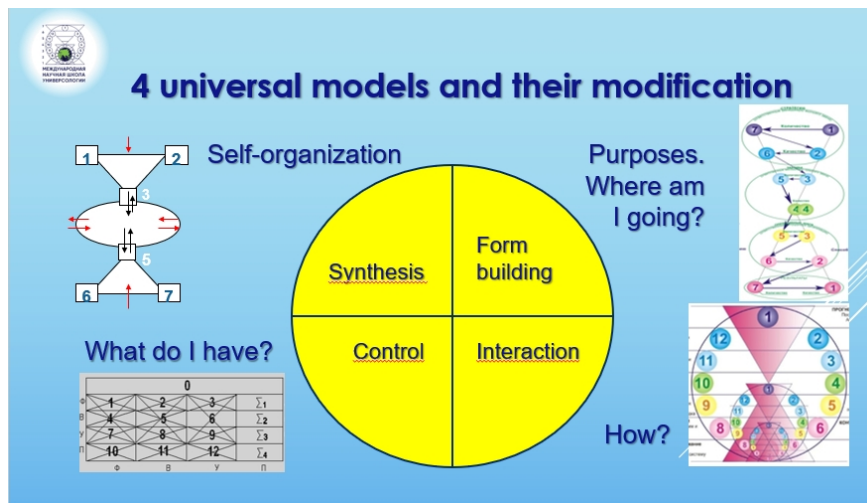

Figure 2. 4 universal models and their modification

Model number 1, the hierarchy of goals, answers the question: where am I going?

This model can be represented as a tree that connects the past, present, and future.

Model number 2, the stages of movement towards the goal (12 stages), shows or describes how to build the right process to achieve the goal. This model is very similar to a wheel.

In psychology, it is called the wheel of balance, and when we see a wheel, we understand that it represents the process of accelerating towards the goal.

This model is based on the law of cycles, the transition from quantitative accumulations to qualitative ones, and answers the question of how I will move towards the goal and how to interact with the world.

Model number 3. The potential capabilities (or energy) that a system possesses.

Answers the question: what do I possess, how can I improve my life?

This model can be represented as energy flows and possibilities.

Like the potential or unmanifested energy that we can unleash and realize in this world.

Model number 4 is self-organization.

The ability to take responsibility, find one's place and role, see prospects for growth and development. This model is very similar to an hourglass, there is a time during which we can accumulate experience of coordination and joint development.

Imagine if a grain of sand were to stop during its transition, there would be no movement in life. The same applies to us—if we stubbornly insist on only our own way, life around us will come to a standstill, and we will be left alone.

Therefore, personal growth is important. Constant personal growth within collectives.

It is important in life to use all 4 management models, rather than getting stuck on just one, then development happens naturally.

The application of all 4 management models is presented in computer programs, and books, and methodological manuals.

We consider life management in 7 spheres of life.

By applying universal management, we gain experience in:

1. Counseling individuals on their purpose, characteristics, abilities, and predispositions, predicting the optimal path of development.

Organizing the life and activities of future cities in Russia, Ukraine, Belarus, and Poland.

Choosing a profession in accordance with one's purpose and calling.

Organizing teams of researchers, laboratories in 8 directions of our departments.

Organizing centers and various forms of collective unity.

Creating families and creative unions that follow a spiritual path, especially important for people after 35-40 years old.

Organizing conscious trips and journeys.

Dissertations by specialists from the Department of Universal Management have been defended in the scientific community.

Vladimir Stepanovich Tsipurinda «The management system of trade enterprises based on an innovative approach».

Tatyana Alexandrovna Serbinskaya «System-level analysis and modeling of the subject component of public administration».

Gennady Moiseevich Steinbock «The mechanism of optimization of the organization's management relations system».

Zhadanov Sergey Stanislavovich «Master's thesis on System Management»

We adapt the Manifesto of Human Evolution for the world.

Enterprises, holdings, and purpose corporations are operating.

The educational programs of the Institute of Universal Management train specialists who are needed by the world:

- System management consultant,
- Systemologist manager,

- Expert in universal management.

We invite you to join us in co-creation, research, and development of future collectives based on harmony, co-creation, and the fulfillment of each person's purpose.

Thus, we are already starting to shape a new way of life with social justice and well-being.

Drozdetzkaya L.S., specialist of the Institute of Non-standard Thinking and Inversive Phenomena Studies (INTIPS), Russia.

EDUCATION OF THE MAN OF THE FUTURE

The focal point of the Institute of Non-standard Thinking and Inversive Phenomena Studies is the theme ‘Education of the man of the Future’. And for this purpose, we create the image of the man of Future in the spirit of a new era as a universal model of the divine human incarnation on the Earth.

Our technologies integrate the practices of all rays into a unified stream to help a person to make a transition into the new era.

In the system of continuous education, we develop the qualities of a man as a leader-creator, able to reveal his uniqueness, purpose and mission for the world.

‘A person learns to understand the essence of transitional processes, conflicts, crises to see in them stages of growth and opportunities to make life more perfect [1]. In this the divine essence of each person is revealed. As a result, a person realizes his true value and importance for humanity and the surrounding world as a whole.

The 4th Ray is the ray of all humanity, the Ray of Harmony Through Conflict [2]. The esoteric essence of the 4th ray is manifested through the activity of the Institute in working with the individual, forming a culture of multidimensional thinking. The uniqueness of the 4th ray is that we show the connection between the Inner and Outer worlds as a mechanism of inversion, which connects a person with his soul.

The universal multi-level education is future-oriented. Within our training processes, we apply technologies for the development of non-standard thinking, reveal the values of a person to the world, create conditions to enter the flow of life, and help to go beyond beyond the achievements of yesterday. In this, the divine essence of each person unfolds.

Every person is born with a unique Destination and throughout his life cognizes and embodies it, improving his Tree of Life, as a symbol of the connection of the internal and external world of a person, clan, people, humanity.

And, in the system of our ongoing education we provide ongoing support to every person in different stages of his life:

- Up to the age of 28 to reveal the inner world of his bright individuality;

- Up to the age of 56 to exchange purposes in unions, groups, teams;
- Up to the age of 84 to be included in public self-government;
- Up to the age of 112 to integrate the accumulated experience of previous periods of life with the experience of the whole of humanity through mentoring.

Through this process, individuals become active participants in the evolution of life. This brings them closer to the state of the flow of life as a multidimensional stage in their ongoing development.

Our unique inversion technologies help to establish a profound connection between the Inner and Outer worlds of a person (fig.1) and the thinking of the Future man is formed. Non-standard and multilevel thinking becomes a tool for forming inversion processes in human consciousness. This contributes to the development of the quality of cordiality in the exchange of destinies filling the world with heart radiance.

Figure 1. The connection of the Inner and Outer Worlds of a person based on the inversion of consciousness.

As a consequence, an individual gains the ability to express his uniqueness across all spheres of life. He enters the rhythm of the elements of nature to reveal the profound meaning of his Divine idea within the project of life through the technology of Balance of the 4 elements. This holistic approach contributes to the growth and development of individuality in personal, collective, and social manifestations.

The life of INTIPS employees is continuous learning and constant co-operation in all spheres of life. As a result, we strive to go beyond what we have achieved individually – through author-led seminars, consultations, the organization of

workshops and active participation in public self-management within the Centers of Universology and the Cities of the Future in the Ukrainian, Ural, European and Siberian regions. This is how the integrity of life for both the individual and the world around him continually evolve.

As a result of the integration of individual, collective, and societal expressions, a human develops sense-awareness, leading to his transition into a new qualitative state. In this way, the individual consciously unites his triple experience with the Divine plan.

‘A new era gives birth to a new way of life. A new way of life gives birth to a new worldview - a causal-systemic hierarchical-value one. A new way of life gives birth to new thinking - synthesizing figurative 4-dimensional sensory-logical non-standard’. Therefore, the transition to a new qualitative state takes place.

There is always a more effective life system as a guide and ideal for the development of individuals and communities. Applying our practices, a person every day sees the meaning of life and prospects of development, which allows him to discover:

- The Spirit of novelty, search, research and discovery.
- The Value of a person for society.
- The New World of opportunities.

This is how a person finds happiness and becomes a Creator of life:

- Realizes his Destination and reveals his value to the world;
 - Fulfills his Divine mission on the planet embodying the highest ideals of humanity:
- Brotherhood - Unveiling the value of one's purpose.
 - Equality - Assisting others in unveiling their value in purpose.
 - Peace - Perfecting the world in harmonious unity.

E. Golub,
coordinator of the Institute of Psychosystemology
and Universal Development Techniques.

PSYCHOSYSTEMOLOGY AND UNIVERSAL DEVELOPMENT TECHNOLOGIES

Psychosystemology is the science of the soul, of the inner world of man, the science of the patterns of development in the hierarchy of psychological systems of life: man, collective, society, humanity, planet, and so on.

Universal technologies for the development of psychological systems include diagnostics, forecasting, modeling, and support in development according to the laws of nature.

Institute Psychosystemology and Universal Development Technologies conducts the energies of the Fifth Ray.

The fifth Ray of specific knowledge based on the highest spiritual ideals stimulates cognition, thinking, logic, the creation of concepts, the materialization of ideas, and the organization of activities.

Its main task is to awaken the Creator in man for the realization and embodiment of the divine plan. It ensures the unity of intellectual activity with intuition and accompanies the evolution of consciousness and the revelation of superpowers.

We present to your attention five programs of the Institute for modern education systems, which are designed for a wide audience and different age categories.

Program number one is a “Formula of Predestination”.

A person needs to understand why he or she came to the earth, and what his or her value is, to reveal the potential given by nature from birth. You see the psychosystemic methods of the Formula of Predestination, which promote self-knowledge to reveal abilities and internal spiritual forces in external activities.

The first method is a human as an energy conductor and a Creator. Conductor of the energies of a new era and Creator of new realities. Second method: The predestination of men and women. Third: 12 personality psychotypes. Fourth: Predestination of an age. Fifth: Predestination in the family. Sixth: Predestination by date of birth. Seventh: Predestination according to value guidelines. Eighth: Predestination of the year and place of birth so-called Ganyu’s chart.

This program is successfully used in educational courses at schools, universities, and public organizations. At the end of the course, participants note significant changes in their lives. They begin to lead a healthy lifestyle, harmoniously express emotions and feelings, think positively and act from the highest ideals, trust people, open and appreciate others, show collective initiatives, and get involved in progressive projects. I tell you from my own experience - I began to write poetry and scientific articles, teach my course “Nature-oriented development technologies” at a university, travel and unite with like-minded people in the international community in the name of the Life of the Future.

A training course “Know your predestination. Psychosystem Diagnostics” allows you to become a specialist in psychosystem diagnostics.

Program number two, “Psychosystemic counseling,” is a technology for helping a person solve acute problems as pressing life challenges. We help update settings, rules, and teach you to make flexible decisions in constantly changing living conditions.

The client's experience is transformed into a scenario of future behavior based on co-creation with a consultant in a unified energy information system. Consulting helps the client discover initially unobvious, but subsequently incredible, own possibilities in solving life problems. This is a unique technology! We have extensive experience in consultations and also train in the specialty of psychosystemologist-consultant.

Program number three is “The art of being together. Seven steps forward”.

This program, based on universal models, helps to form harmonious relationships between a person and the world and people around him. I would like to note that I successfully used developments in raising my five children and a grandson.

We take 7 steps towards ourselves, each other, in the relationship between a man and a woman, in the relationship between parents and children, the team, society, and the future.

Our developments have been tested in various educational institutions and are recommended for widespread use. The future lies in psychosystemology in preparing a person for cooperation in the collective energies of the new era.

Program number four is “Mode of activity of the future”.

The depth of relationships between people leads to a new quality of life - this is the foundation of effective cooperation in activities. We introduce the concept of spiritual professions as the role of a person in a team and society. Fundamentals of the activities of the future: choice in favor of spiritual ideals, collective priorities, realization of predestination, and cooperation based on the exchange of the last.

The fifth program “Energy practice “The Wave of Light”.

The Institute’s team of specialists carries out daily energy work to maintain Peace on the Planet. This is our service and spiritual work in modeling the Future.

So, our international team has been developing and conducting five programs, five practices in different countries for 29 years. All our programs are provided with methodological and non-fiction literature.

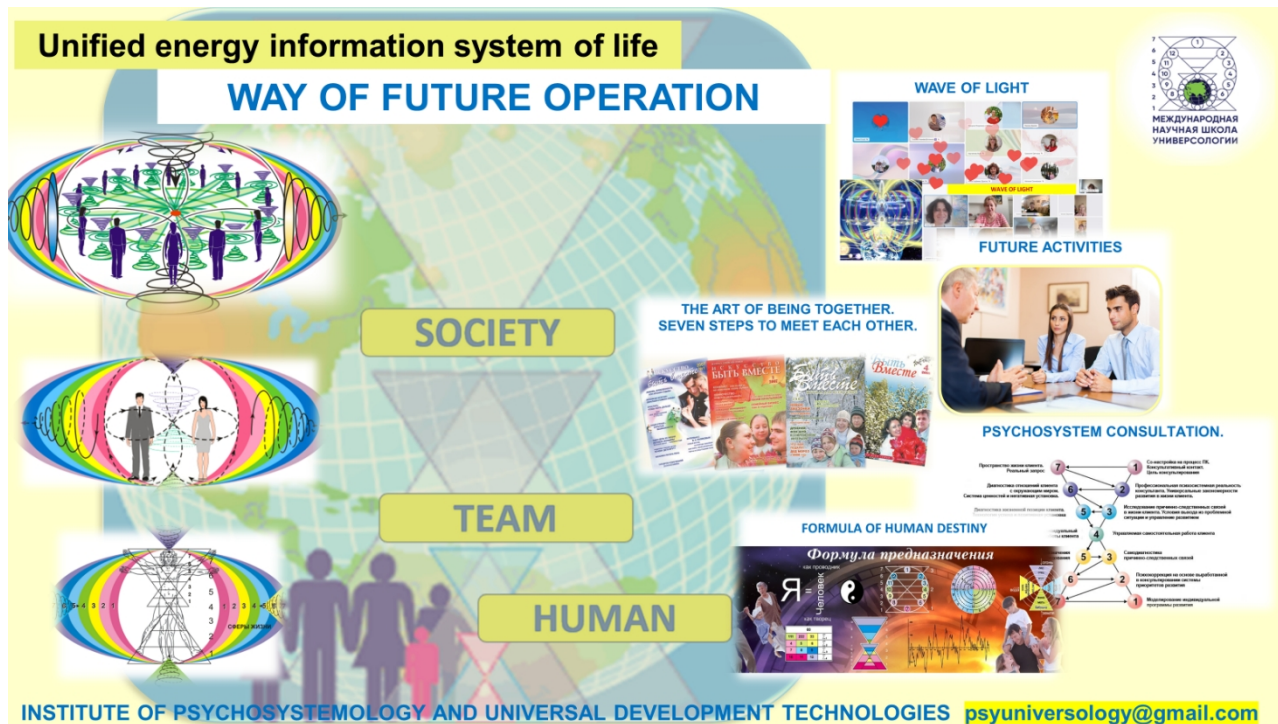

Figure 1. “System complex of programs of the Institute of Psychosystemology and Universal Technologies of Development based on the energies of the 5th Ray”.

In the Scheme 1 we see a systemic picture of the world, a systemic complex in which the energies of the 5th Ray and the programs of the Institute of Psychosystemology and Universal Development Technologies accompany the growth and expansion of human consciousness. As you can see, we start together in the Universe from Man, who is the fundamental principle of the collective, social, universal, planetary and stellar worlds. Therefore, all our programs form a causal-systemic worldview, systemic-logical thinking, and sensory-logical perception of the world. These are the foundations and innovations of the mental abilities of the Future Man.

The team of specialists at our institute wishes you well, love and peace.
We invite you to cooperate.

G. Saunina, specialist of the Institute of Modeling Nature-Oriented Lifestyle.

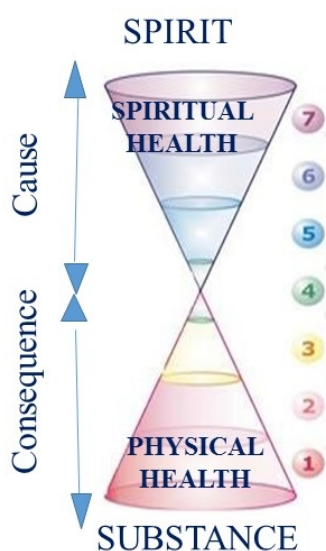

NATURE-ORIENTED LIFESTYLE OF A HUMAN. SPIRITUAL PRINCIPLES OF HEALTH

We help people to live a nature-oriented lifestyle. This is one of the main tasks of the Age of Aquarius.

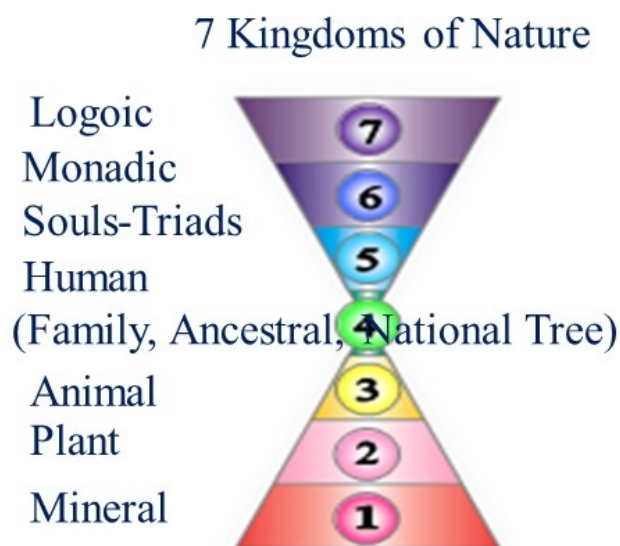

The esoteric essence of the nature-oriented lifestyle is based on the work of the energies of the 6th cosmic Ray: Ray of Devotion and Idealism. On the planet, it is responsible for spiritual healing and is the basis of physical health. Spirit (Spiritual health) is the cause. Substance (physical health) is the consequence. That is why we do not agree with the statement: “In a healthy body, there is a healthy Spirit.” In fact, the opposite is true (drawing 1).

The 6th cosmic ray is based on:

- Devotion to the highest ideals of Brotherhood as new forms of relationships based on the equality of purposes of all systems of life.
- The Ray power of the 6th Ray comes together with the Ray of Love and Wisdom.
- It is an expression of the divine nature itself, manifested in its 7 Kingdoms (drawing 2.).

drawing 1.

drawing 2.

In our activities, we focus on evolutionary value guidelines for development:

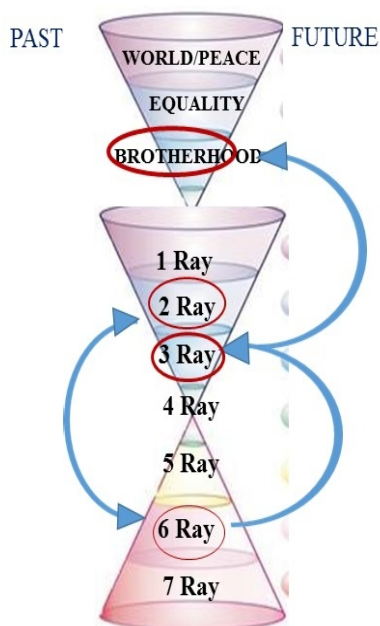

- World/Peace
- Equality

- Brotherhood

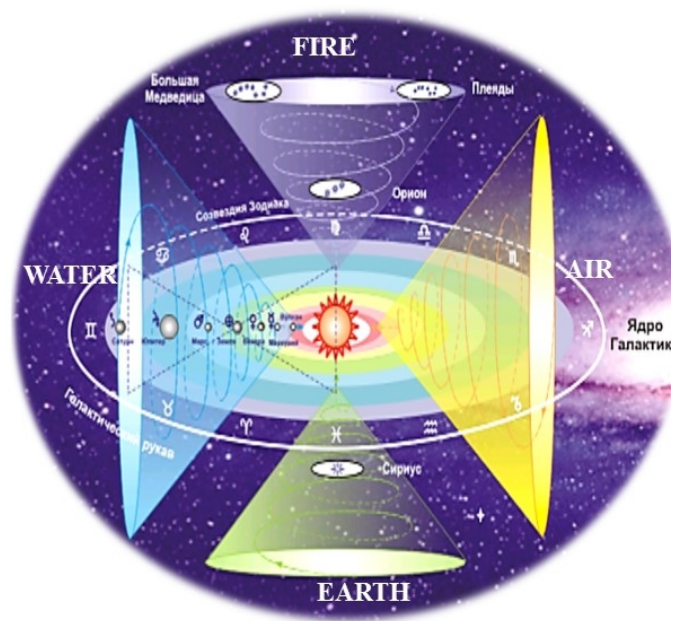

The way to the future for the Institute lies through the collective strategy and through the characteristics of the 3rd Ray of Activity of spirit in substance (drawing 3). This means that to be spiritually and physically healthy, a human needs to cooperate and actively exchange his/her destiny with all 7 kingdoms of nature.

The concept of “nature-oriented” means “balanced”. Balanced development is based on the balance of 4 elements (4 types of energies) of Nature: Fire, Earth, Air, Water (drawing 4):

- Fire symbolizes goals (tasks, program) of development.
- Earth – resources that are necessary to achieve the goal.
- Air - activity towards the achievement of the goal.
- Water is a result that can change the World for the better.

drawing 3.

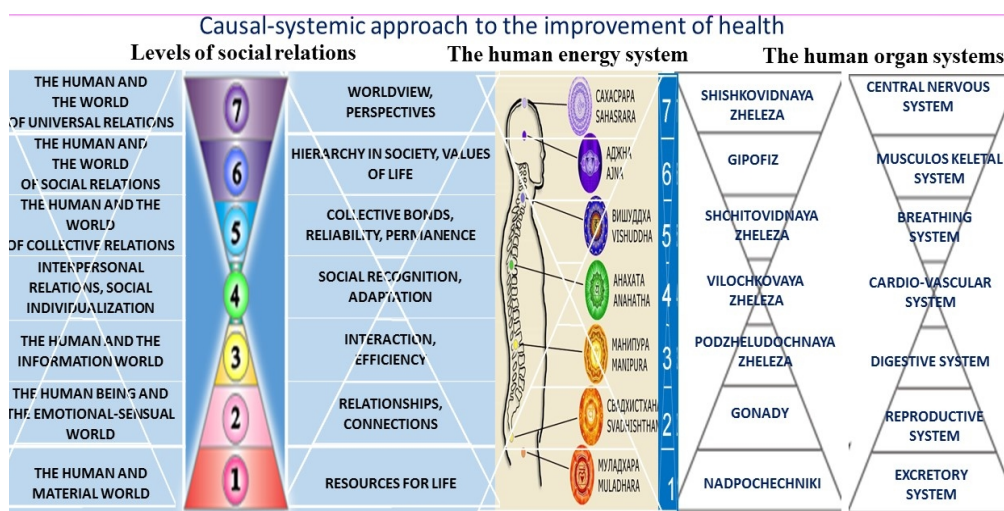

drawing 4.

A human learns to live in harmony of the balance of the 4 elements.

A human is a product of systemic relationships with the world!

4 Elements form the directions of his/her activities in 7-level systemic relationships, including with all kingdoms of nature (vertically), and in 7 areas of life (horizontally). This creates the possibility of multifaceted manifestation in the surrounding world, which contributes to nature-oriented life (according to the laws of nature).

Violation of harmony, balance of forces, and laws of nature leads a person to illness – so said Hippocrates. Since the time of Hippocrates, people have tried to find out the causes of diseases and the origins of health.

drawing 5.

The International Scientific School of Universology has developed a causal-systemic approach in determining the causes of diseases. The diagram on this slide shows the relationship between the 7 levels of a human's systemic relationship with the world and his/her 7 endocrine glands (drawing 5).

The products that we are using to determine the causes of illnesses, predispositions to diseases, and recommendations for improvements, are:

- 1) The book "Causes of Diseases. Origins of health."
- 2) Computer program "Hippocrates".
- 3) Healthy Lifestyle.

SPIRITUAL PRINCIPLES OF HEALTH ARE CONNECTED WITH THE KEY PRINCIPLES OF UNIVERSOLOGY:

- 1) Advisability
- 2) Systematicity
- 3) Development
- 4) Unity
- 5) Diversity
- 6) Connectivity
- 7) Versatility

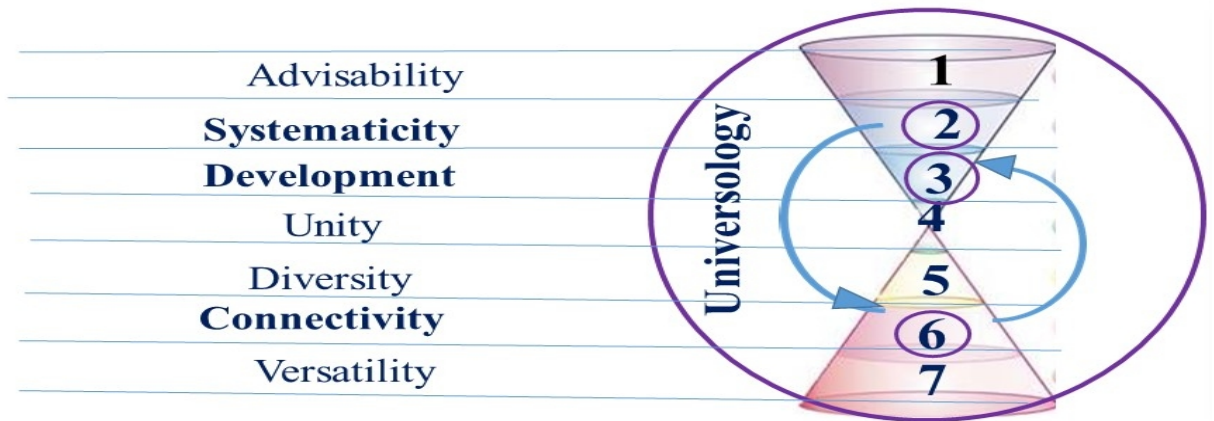

The following principles are especially important to us:

Systematicity reflects the hierarchy of all living systems and means reconciliation of individual and general values.

Connectivity is a set of hierarchical and synergetic relationships flowing simultaneously (drawing 6).

The following principles are especially important to us:
Systematicity- Connectivity- Development

KEY PRINCIPLES OF UNIVERSOLOGY:

drawing 6.

Development: consistency in development is the future.

The principle of interconnectivity lies at the core of spiritual healing.

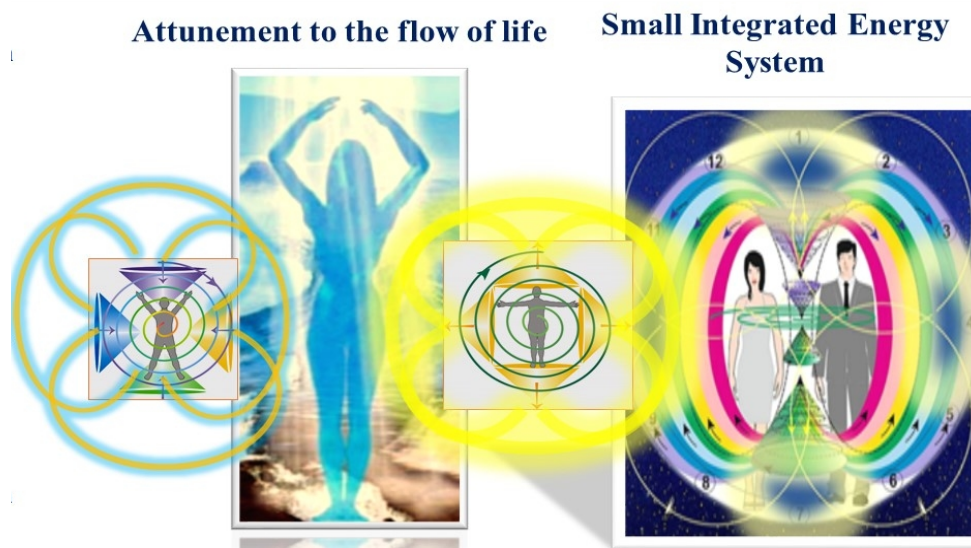

The basis of spiritual healing is the restoration of broken connections between the energy system of Soul and Personality. It is a base of psychotherapy and healing in the flow of the unified energy system.

Attunement and construction of the Unified Energy System are our basic techniques.

The principle of interconnectivity lies at the core of spiritual healing.

The basis of spiritual healing is the restoration of broken connections between the energy system of Soul and Personality. It is a base of psychotherapy and healing in the flow of the unified energy system.

Attunement and construction of the Unified Energy System are our basic techniques (drawing 7).

drawing 7.

For studying all the abovementioned methods, there is a basic course named “Modeling of a nature-oriented lifestyle” This COURSE is a practice-oriented education in innovative technologies of NATURE-ORIENTED LIFESTYLE (HLS).

As a summary, we would like to note that we have an idea in the name of which we work and live, and products that provide a human with spiritual and physical health.

We invite you to cooperate.

UNIVERSAL MODELLING OF THE SPACE OF THE AGE OF AQUARIUS

The energies of the 7th Ray are transmitted by the Constellation Aquarius and the planet Uranus to the Earth. They require renewal and transformation of the 7 spheres of human activity. 7 Ray carries qualities of ceremonial magic and order, awakes radiative activity in the atom, of the man of the universe. The main function of the seventh ray is to establish order and maintain rhythm.

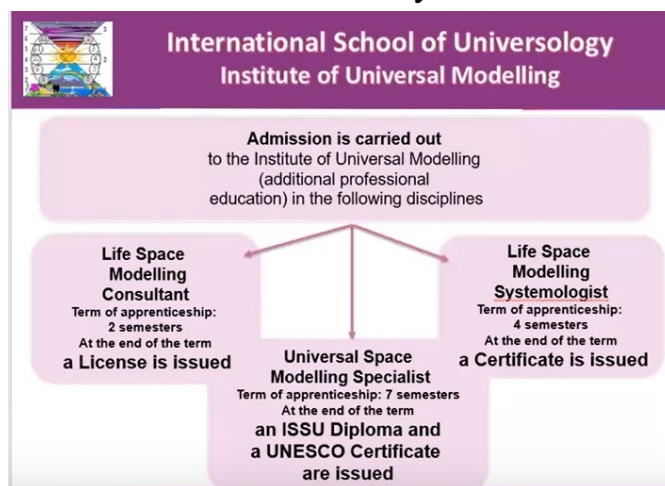

Figure 1. Institute of Universal Modelling.

Our Institute is engaged in universal modelling of the space of the Aquarian era. Technologies and methods of the International Scientific School of Universology are formed in accordance with the laws of nature.

The course "Modelling the Space of Life" gives each person the opportunity to find their uniqueness, their purpose and, on this basis, create the space of their life (housing, relationships, creativity). Knowledge of the universal laws of development helps to decipher the symbolism of the world culture and their life. Modelling the space of life includes all areas of human interaction with the world, and particularly the work collective, the public sphere of life, strategic plans and prospects. The course is conducted remotely, with the organization of an in-person practical session. As an example, we explore and model the urban space of Future where people could implement their life mission together in collective strategy and territorial self-management.

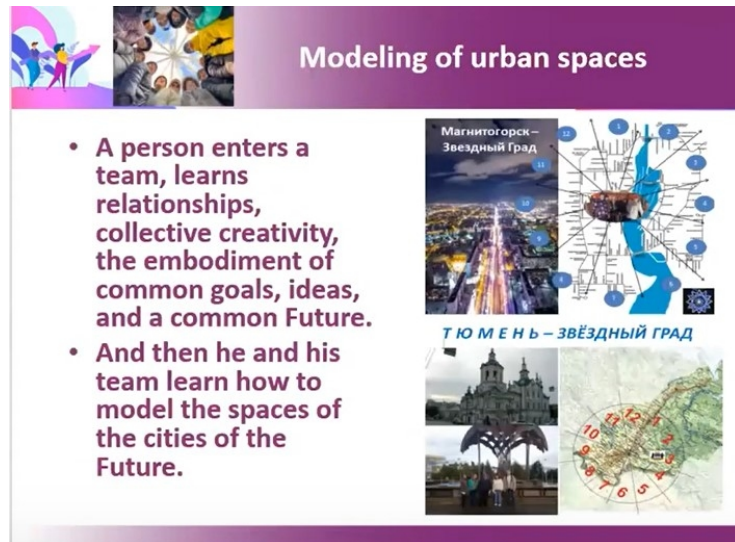

Figure 2. Modeling of urban spaces.

This model completely replicates the celestial mechanics. The first Hermetic principle state “As above, so below.” As the 12 zodiac constellations broadcast 7 ray streams through the planets of the solar system the earthly forms should reflect the space constellations and planetary organism into the human kingdom of nature.

Figure 3. The circular structure.

The same principle repeats in the mankind organization and its history:

- 12 civilizations
- 12 nations
- 12 kins
- 12 family trees
- 12 personality types.

Moreover, every human has a twelve-channel meridian system, where the flow moves into the person energy system and stimulates his/her consciousness and heart.

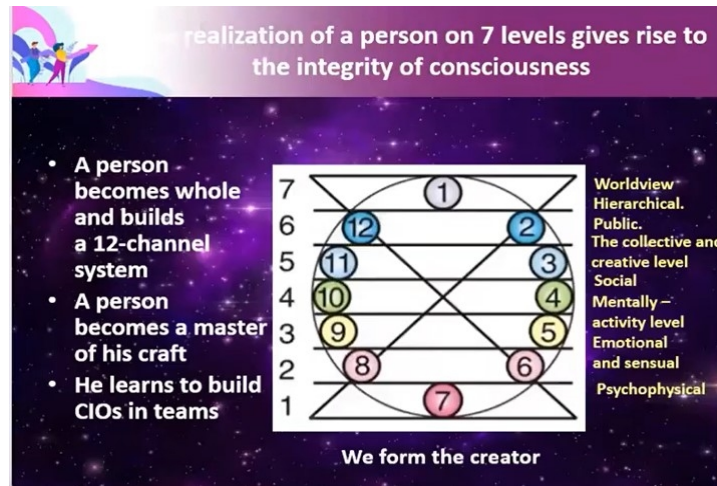

Figure 4. Twelve-channel meridian system.

Every human needs help in adaptation to flows. Universal modelling of his living space at home, office, city, country will help him. For this purpose, the Institute has created a computer program – The Universal Feng Shui. The program concept is based on the universal models. For space modelling we reveal 7 spheres of human activity.

Modelling the space, one should choose the image and likeness to the Heavenly Temple. In this purpose he/she divides the space into 12 sectors that transforms the house into the energy reflection of the Temple of the Universe.

Modelling considers the model of a human potential. It gradually reveals a 12-channel system of sacred genius. A person joins a team, learns how to create positive relationships, involves in collective creativity and the implementation of common goals and ideas for the future.

Then the team models the space of the city of the future after its exploration in agreement with the Motherland development purpose. The responsibility for the native land and the image of happy future are put into the Chalice of the Mother of the Motherland.

The Civic Centres and Laya Centres, where our co-creators work, were built according to the same model.

We build pyramids and domed houses, which are based on the principle of the golden ratio and other divine proportion. The construction of pyramids creates a balance of elements in nature and in humans. Our cities of the future resemble the buildings in Auroville.

Then we initiate interest in the study of civilizations and the stream of cosmic consciousness is revealed in him.

The Institute of Universal Modelling trains specialists: space modelling consultants, space modelling systemologists, experts in universal space modelling. We invite like-minded specialists, scientists, experimenters to cooperation and common training.

Training is conducted by teachers of international level. Our absolvents receive UNESCO certificates.

*Advaitananda Mihai Stoian, the director
of developing programs for
the Institute for Quantum Transformation
(Denmark)*

**THE UNIVERSAL LANGUAGE THAT IS BASED ON THE UNIVERSAL
GODLY LAWS AND PRINCIPLES: A NEED FOR OUR TIME AS A
UNIFYING PLATFORM FOR ALL HUMAN DEVELOPMENT.**

Advaitananda Mihai Stoian, the director of developing programs for the Institute for Quantum Transformation (Denmark) represents vast network of scientific researchers and spiritual practitioners, people driven mainly by the aspiration for betterment of the human being and of the society. This major research was the subject of their work of many decades. The main orientation of this work was to synthesize the core values and the mechanisms that are revealed in the ancient traditions as well as within the modern scientific frame.

The central focus of this work was human being per se and it's most important characteristic, which is the consciousness itself. The whole work started from one person, who practically generated almost like a “snowball effect”, putting some very important problems and raising some important questions, offering some approaches that represented at the time a genuine revolutionary flip of perspective. The work started during the seventies, beyond so called “iron curtain” in countries like Romania. This detail may not seem so important, but it shaped in a certain way the work process as it needs to be proven. In our times, we need to prove every step that was done, as well as to practically validate all the findings.

In the following we will present here just one side of this multifaceted activity of the network, which represents the universal language based on the universal godly laws and principles.

The work started from the observation that all genuine spiritual traditions of our world present similar or even identical laws and principles that are at the root of their system (when you, of course, strip these traditions of some cultural specifications). Moreover, synthesizing these common laws and principles, they were recognized as supporting the scientific system and it's very core as well. In this work there were involved lots of scientists, who were also spiritual practitioners. Thus they managed to develop some methods to validate by direct experimentation many of these laws and principles. And in this way, it became possible to deepen this study through

direct experimentation and even through some quite amazing results validating this approach. Such as, for instance, expanding the capacity to use the entire brain capacity of a human being way beyond the measures that were done before, and other performances that were considered in old texts as being paranormal. All that was studied with the scientific methods and proved to be just within another form of normality.

It's not so easy to come with such transformation of paradigm with such results, that is why over the last 40 years this work was facing some adversities from the societies where the researches were acting. Sometimes the obtained results were putting medicine in a very difficult spot to explain them, as well as other branches of science were put in a difficult spot. But still, the result of this work became an enormous platform explaining and revealing more than 1300 universal laws and principles. All these principles and laws can be found embedded in all traditions, in all spiritual systems, as well as in modern philosophical systems or in science.

Later on the work was continued with elaboration of the special courses for explaining and practically exploring the human consciousness based on these principles and laws. This resulted in a very harmonious emergence between very different systems of personal development. People practicing various systems, people from different backgrounds and educations found themselves united naturally by understanding the principles and laws that are governing their practice, their work and even their job. By implementation of this platform the researches could unify in an extremely simple way even the apparently contradictory systems, as they're always having in reality, as a common denominator, the human being and its consciousness governed by those laws and principles. And therefore, this became a genuine platform of universal understanding of various perspectives and various systems of knowledge structured in a perfectly coherent manner.

These scientists discovered and validated practically the fact that such a platform represents a genuine so called “meta-language”, that helps everyone understand the fundamental perspective of all the others and realize what is behind all the appearances and even sometimes behind the alleged differences that separates people.

It represents an extraordinary discovery because one of the main characteristics of the world today is differences and separations, though everyone tries to speak about unification. Therefore, the implementation of this system in an education, was proven to be the catalyst of a durable state of harmony and coherence across cultures and across various spiritual perspectives.

Experimentally this system was implemented in various communities and it was noticed that immediately the barriers dissolved, people reached out and started to unify with other even sometimes apparently conflictual communities. In a certain way, this platform of laws and principles form a language of universal education and because all the discoveries were synthesized into coherent courses, just for the sake of experimentation, they proved to have universal educational effect. It makes all human able to go beyond what is different in order to realize a state of unity without cancelling (and this is another interesting perspective) any of their specificity. In a certain way it was truly a very practical approach on the famous saying “unity in diversity”.

This immense body of practical knowledge was structured during many years in these practical courses and methods, which were implemented in various communities across 35 countries so far. Among others things, the result was the development of international community which didn't even need a strong administrative structure, as normally an international community would need, but yet it keeps its cohesion and effectiveness. We call it an open system because indeed nobody owns it, everybody participates into it and the work that is done by all the participants is a very synchronized work from its root.

The reason for that is the fact that all the participants first and foremost have brought into the field of their awareness and integrated in their life the laws and principles that governs the entire goal of creation and their own life. Practically this resulted in a very high degree of coherence, alignment of everyone's interests and a synchronous rhythm of work that needed almost no coordination. It was a clear proof that such a gigantic amount of work, which is the equivalent of many universities material put together, was possible to be done by various persons in various countries, in various communities and yet, perfectly synchronized.

In the beginning this effect remained almost unnoticed due to the fact that it is very subtle and transcends the plane of daily preoccupations. However, implementing the first results of this research in various communities, some of them separated by big cultural, historical or religious differences, the formation of a natural networking process between the people started to appear. Its worth mentioning that this knowledge is still not fully developed, it's in the middle of the process,

It appeared as natural networking because the barriers were dissolved, very much similar to the formation of the nervous system within the human body and the

development of the morphogenesis. Those researches who were specialized in this domain of science even started to study it, stating, “Look, this is almost like growing an organism, we already have a community that have a morphogenesis”, analogically speaking, of course.

In a few years the researchers got convinced that all genuine spiritual systems, all life perspectives can find their natural place on this platform, which is perfectly integrated with the scientific view and methodology as well. The biggest and immediate benefit from this was the understanding and development of practical methods to study the human consciousness itself.

Many researchers and practitioners connected in this fundamental way became a “single body” of tremendous power, the power of understanding. The result was raising some of the known methods (starting from breathing methods and knowledge about the five fundamental categories of vibration, tatvas, and so on) to unprecedented level of effectiveness. The results measured in labs were quite astonishing and shocking in the beginning, but by the the end the researchers got used to them.

This was leading also to the discovery which is considered to be one of the most important effect of this reserch. The researchers managed to discover the existence of characteristics of the godly absolute consciousness, of the consciousness itself. For this reason, these characteristics could be called godly attributes, as they are fundamental and present in the root of all human fundamental beneficial experiences: love, compassion, honesty, heroism, intelligence, wisdom, limitlessness, expansion, transcendence, aspiration, enthusiasm. The list can continue on and on. It was discovered that all of them have perfect energies beyond them, the energies that have the constant frequency of vibration that never modifies. These elements discovered are the genuine universal constants that cross the boundaries of the physical universe. They are practically present in the whole macrocosm and constitute in this way the frame of functioning of the human consciousness as well.

In this discovery there were also developed methods how to consciously reconnect and work with over 350 of these fundamental godly attributes of macrocosm, or macrocosmic constants. By implementation of these methods clear results were obtained. These results prove that such approach on researching the human condition and consciousness eliminate from the beginning the apparently conflictual perspectives and create a sustainable cooperation between all the groups of the human community.

In the end of this survey we can show two examples of such interesting effectiveness.

For instance, long before multipolarity became a subject of the talk in the today's world, in this community approximately 30 years ago the whole idea of multipolarity emerged naturally and it was developed even to a very large extent, down to practical ways to the transition phase how to implement multipolarity in the world. And that was just a spontaneous emergence.

Another example is about traditional values that we speak to and become aware today. They are revalued in countries like Russia, for instance, as well as in the other countries like India. In other places, we have to admit, they are vehemently denied and considered obsolete (but that's another element). These traditional values were long ago studied and validated within this network with the methods of science using the system of universal laws and principles. In this way long ago was discovered the fact that these so called traditional values are in reality expressions of universal laws and principles accurately described by some ancient societies. So in this way they managed to prove that they are actually not “traditional”, but universal values that are valid now, as well as in old times, and in the future.
